About Theme Infigo

Infigo is a Responsive, Clean, Modern & Sectioned Odoo eCommerce Theme. Crafted to be Pixel Perfect, it is built using Bootstrap Grid and can be suitable for any kind of online store category like Fashion, Electronics, Beauty, Health & Fitness, Jewelleries, Sports etc. It contains 20+ custom business snippets and 20+ custom eCommerce snippets that make Theme Infigo most suitable for both Business and eCommerce Industry. It is a fully responsive theme and looks equally stunning on all kinds of screens and devices. It is built with various attractive features like 2 Attractive Home Page Layouts, a Unique Megastore Layout, Ajax based Product Loading, Customisable Mega Menu Layouts, 6 different Color Schemes, Navigating next and previous items in Product Page, Category wise Global Search in Header etc.., that would take months to build. Information blocks are neatly displayed to customers so they can easily find the information they need. Rest assured, Infigo will make your web store look stunningly beautiful.

Installation of Theme Infigo

Before installing Theme Infigo, make sure that you have downloaded latest Odoo version. Follow below steps to install Theme Infigo in Odoo V11.

1. Once you download this Theme from Odoo Store, you will get one folder "theme_infigo". Inside that folder you will get another compressed file – infigo.tar.gz.
2. By extracting "infigo.tar.gz" file, you will get set of other modules inside it.
3. Copy those modules from folder "infigo" and paste them along with "theme_infigo" module. Delete folder "infigo" inside module "theme_infigo". Go inside theme_infigo folder and open "__manifest__.py" file. Uncomment all the dependent modules and add comment to the module "website".
4. Make sure you add path of theme_infigo and other modules into your config file of Odoo. Better practice should be to add them all in one folder - For example : infigo - and add that folder's path in your config file of Odoo.
5. Go to your Odoo instance and start Odoo in Developer Mode. In order to do that, go to menu "Settings" and click on "Activate the developer mode" link.
6. Under the menu "Apps" click on Submenu "Update Apps List" and than find the module "theme_infigo". Install it and you are done!

[Click here to see sample video for this process.](#)

Bug Support Policy of Theme Infigo

Our all Odoo Themes have passed under rigorous testing carried out by our Odoo Experts and works perfectly well with default Odoo modules. However, we are fully committed to resolve any bugs/issues that are reported to us. We provide this support without any additional cost.

At times, other 3rd party Odoo modules or some server issues may conflict with our Theme modules and result in an issue or unexpected behavior. As this is something not under our control, we do not consider this as a bug/issue and hence such scenarios does not warrant free support. We will be open to providing paid support to resolve issues for such scenarios.

Also, we promise to deliver you the features that we promise on our product page. Customers who want new features or modification of existing features can request Theme Customization. Our team of expert and experienced Odoo eCommerce developers and Web Specialists will be happy to help you with additional customizations and this service can be purchased as hourly service packs.

For reaching our support team, kindly drop us an email on support@emiprotechnologies.com. Please report the issue in full detail along with screenshots to ensure quick resolution. We may require your Odoo Login details and Server's SSH access details to analyze and resolve issues if they cannot be handled in our local environment. We expect that the customer should be willing to provide us the required access credentials to continue availing our support.

Support turnaround time: 24 to 48 hours

Support team availability: Monday to Friday, 09:30 - 19:00 IST

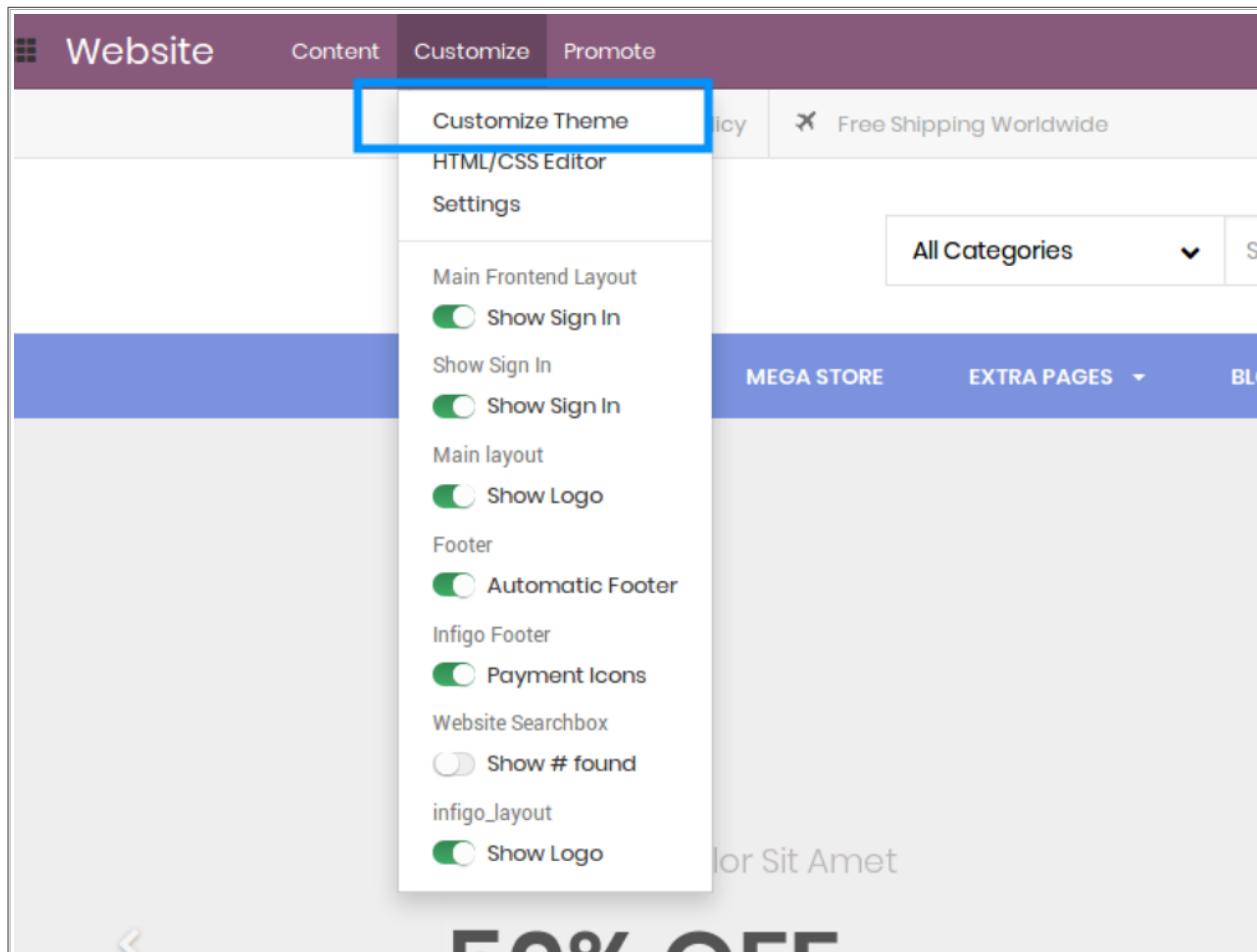

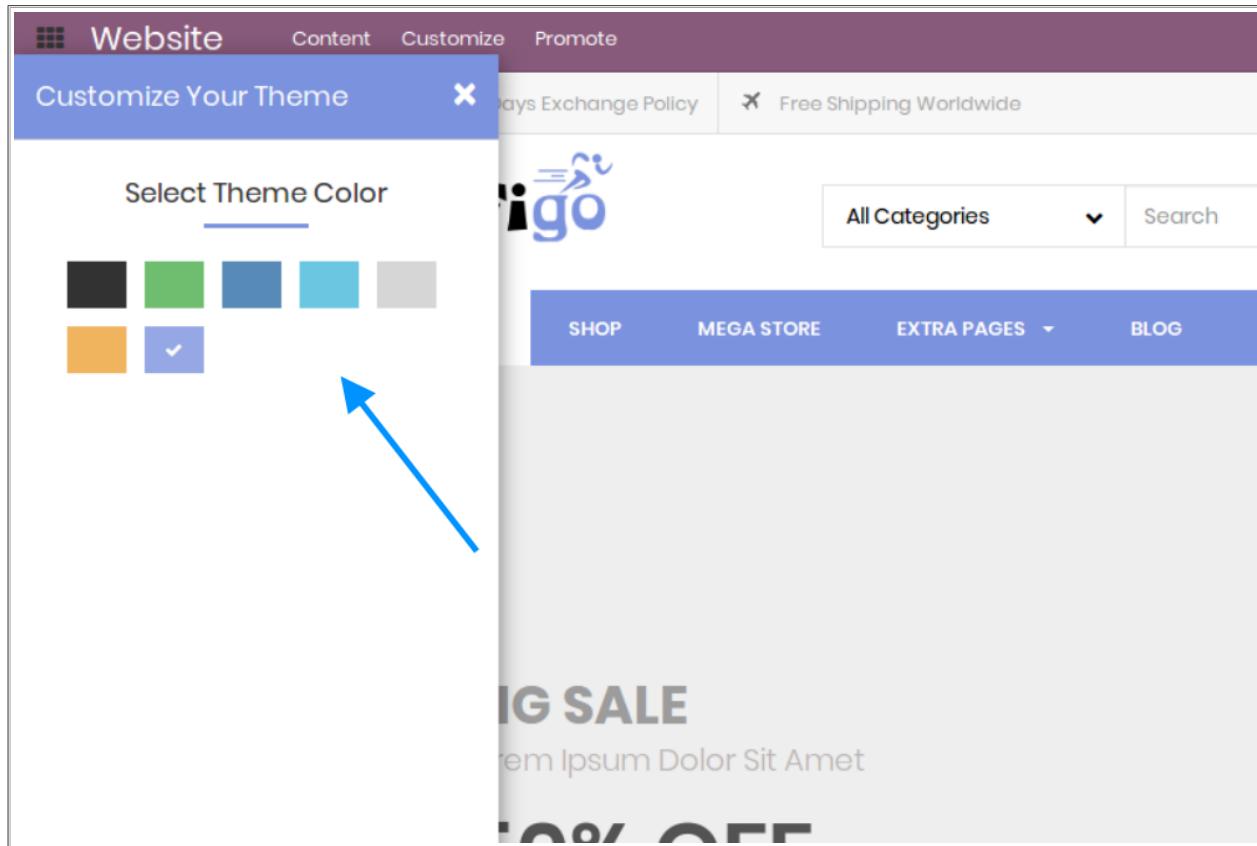

We would love to go above and beyond our duties to help our customer and will always attempt to attend your queries as quickly as possible even outside our working hours whenever possible.

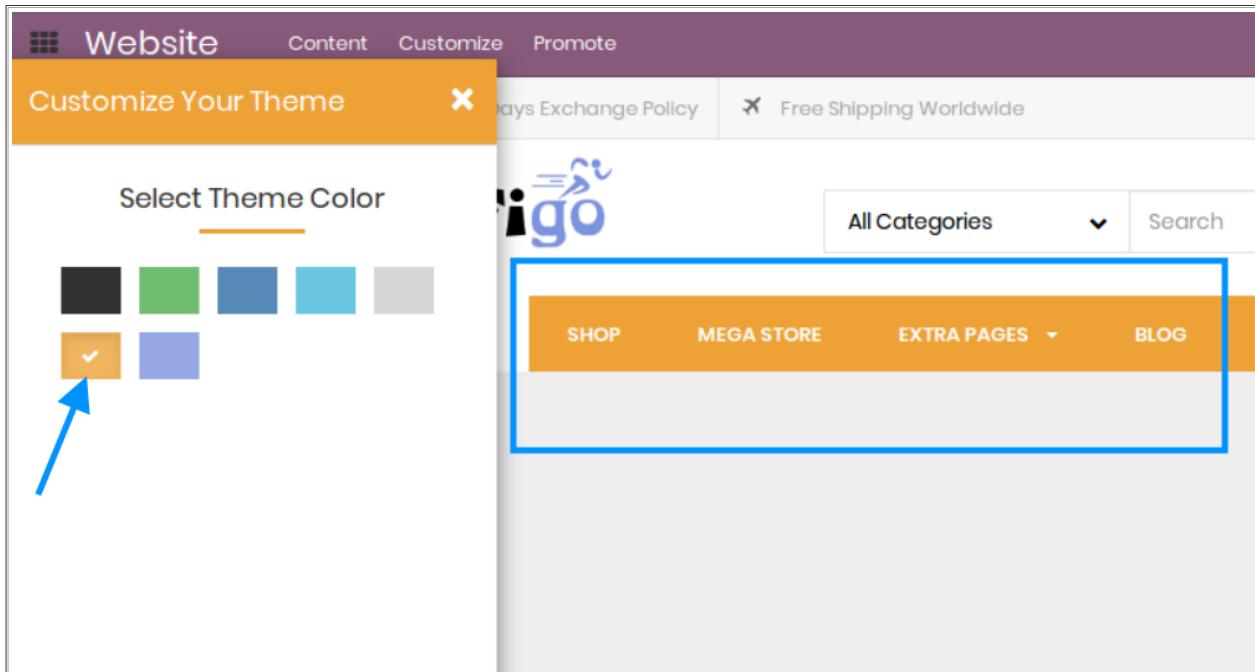

Customise Default Theme Color from available Color list

On Installing Theme Infigo there will be option available in **Customize** as **Customize Theme**. On clicking that a small screen will be opened having 6 different color.

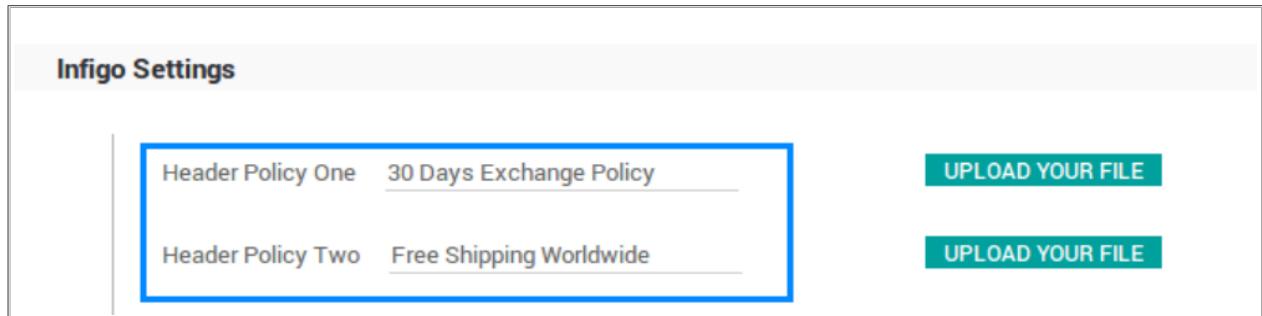

You can select any color from the available colors which is best suited for your Web Page.

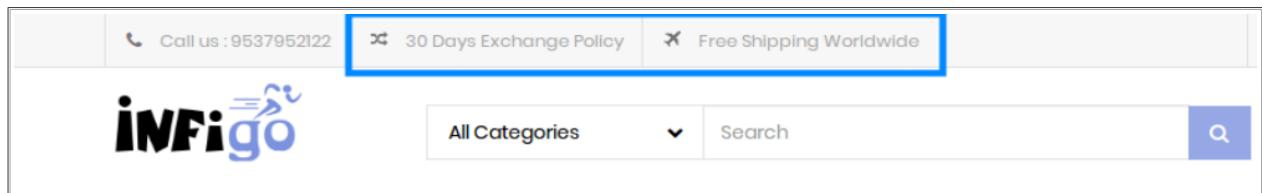

Header

1. Offer Style

In order to configure the offer style Go to menu **Website -> Configuration -> Setting -> Infigo Setting,**

At there, give the title and upload the icon for the header policy. After defining the policy and uploading the image you can notice the policy and icon image as shown in the image below.

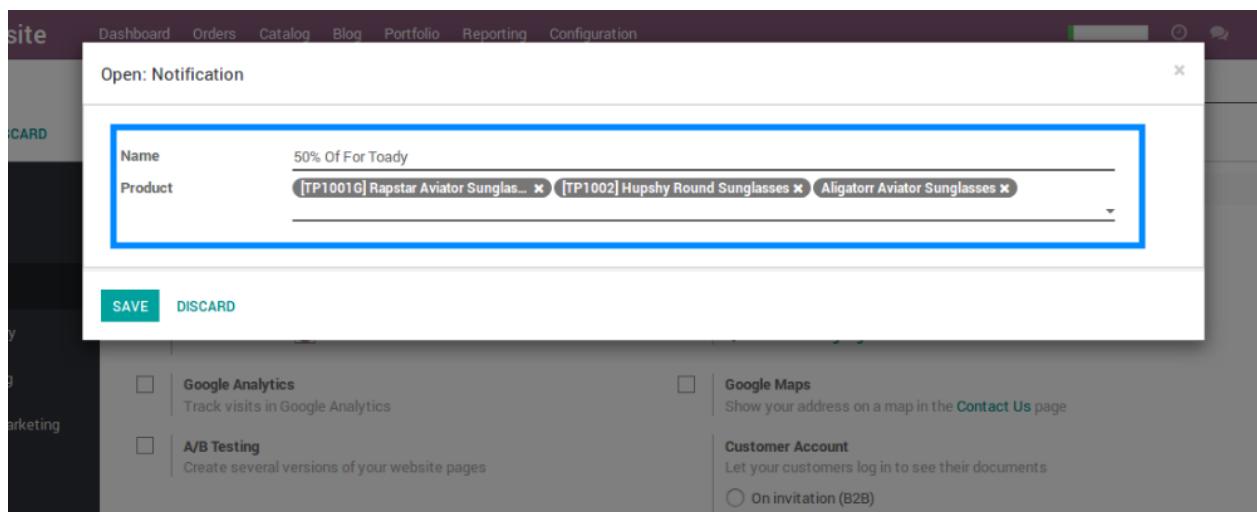

Call us info will be taken from Company's address.

2. Notification

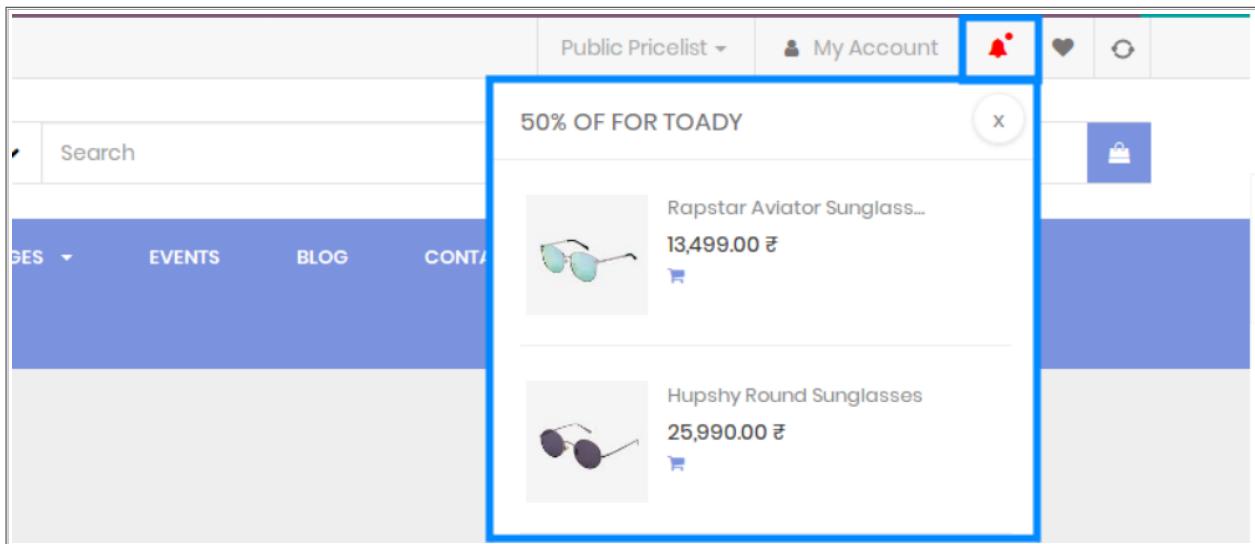

To activate the Header notification feature, go to **Website -> Configuration -> Setting -> Infigo Setting.** At there, select any of the previous notification if you have already created else you can also create it on the fly.

Infigo Settings

Header Policy One	30 Days Exchange Policy	iVBORw0KGgoAAAANSUh		
Header Policy Two	Free Shipping Worldwide	iVBORw0KGgoAAAANSUh		
Wishlist Login Image	UPLOAD YOUR FILE			
Header Notification	50% Off For Today			

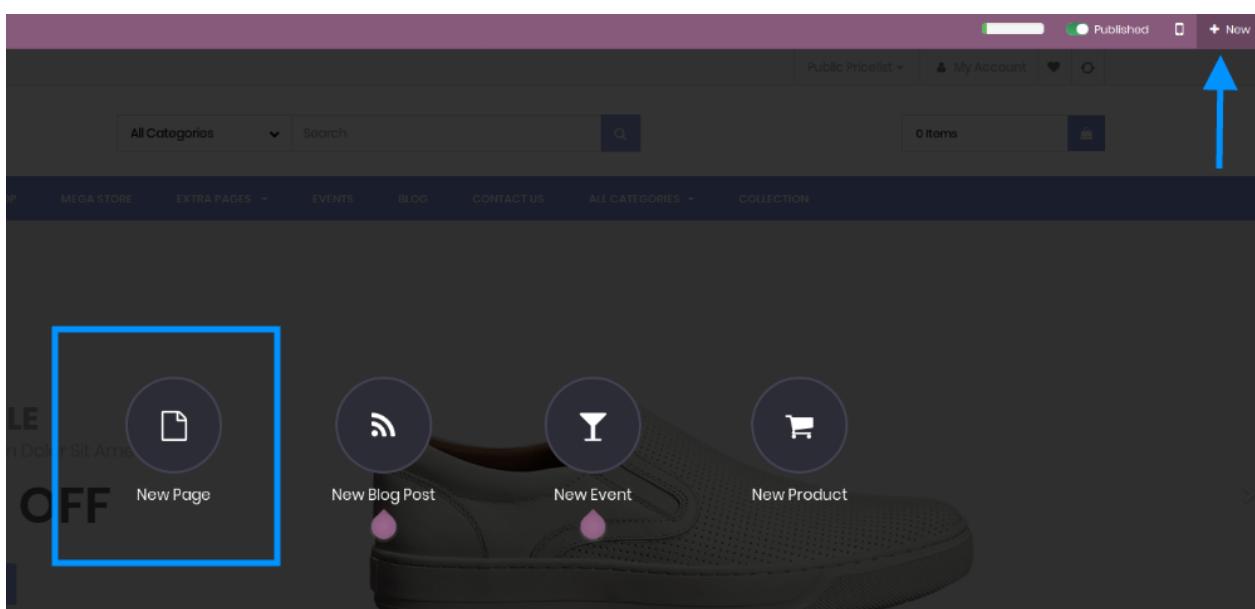

After the configuration of the header notification you can find it from the frontend as shown in the image below.

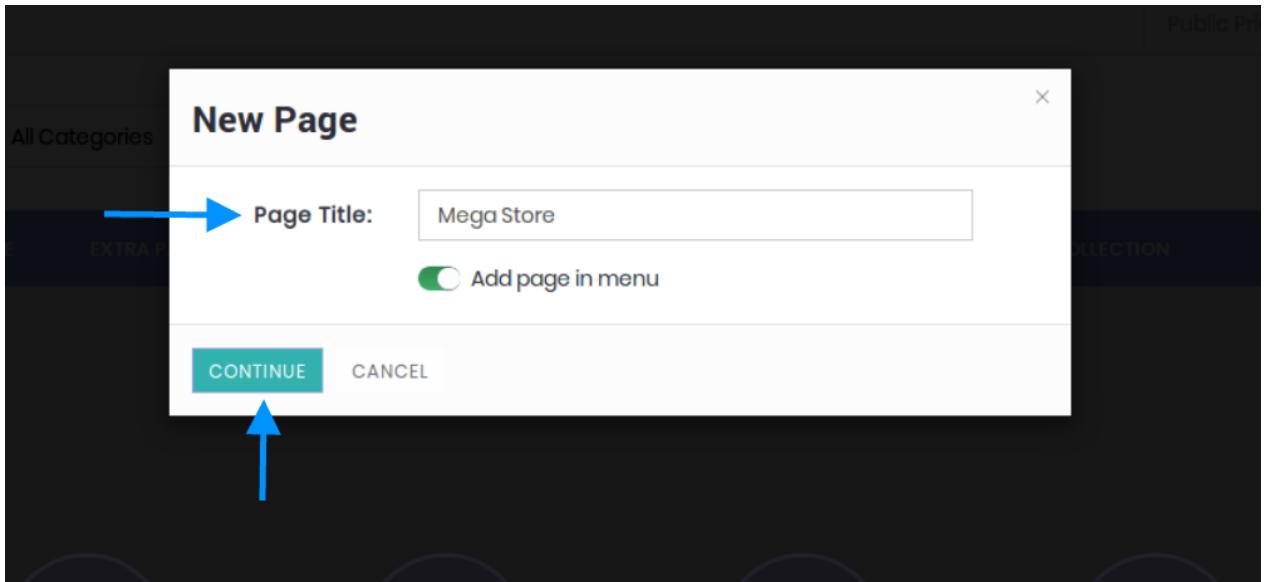

[Click here to see Video of this feature.](#)

3. Create and Built Menu with Custom Design

To Built a Menu Create a new page using **New --> New Page** in your Web Page.

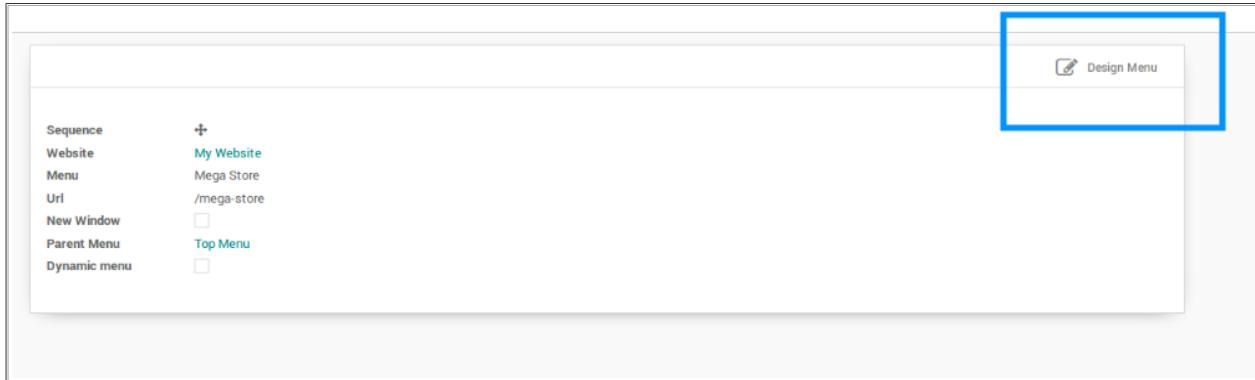

By doing this, a pop up will be visible asking for name of the Page. Enter the name and click on Continue. This will generate a New Menu with the name given by you.

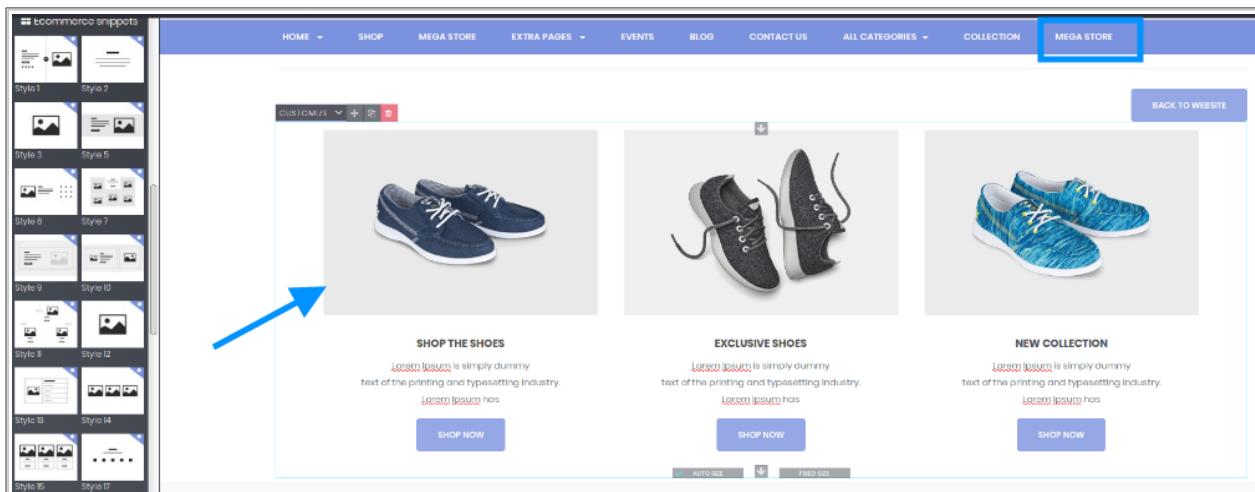

Now go to (Odoo's Backend View) **Website --> Configuration --> Website Menu**

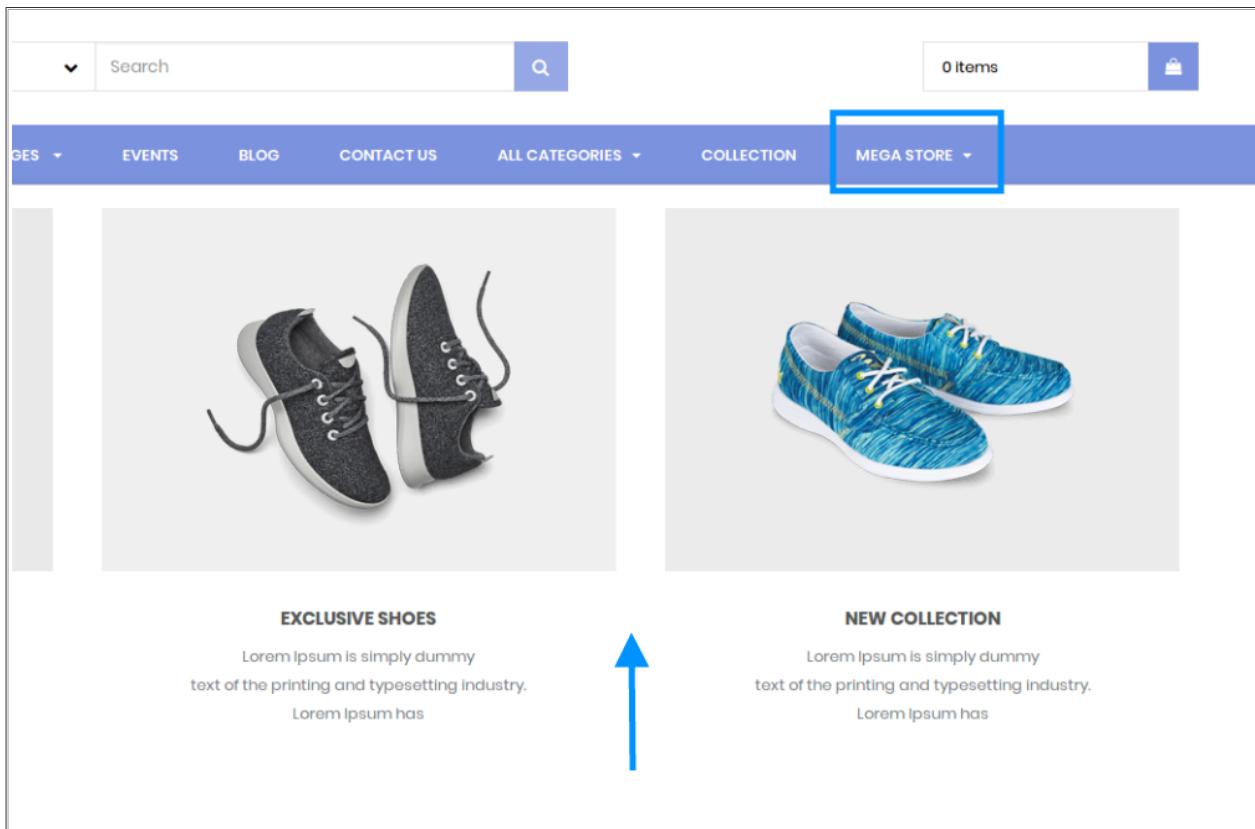

Configuration. There you will find the Record of Menu created by you in your Web Page.

Open the Record of Menu and click on **Design Menu**.

It will redirect you to the Web Page, there you can drag any snippet which suits your Menu and Save the changes.

[Click Here to see video of this feature](#)

4. Deactivate any Menu

To Deactivate any Menu Go to **Website --> Configuration --> Website Menu**

Configuration. Open the menu record you would like to Deactivate.

Catalog Blog Portfolio Reporting Configuration

:S

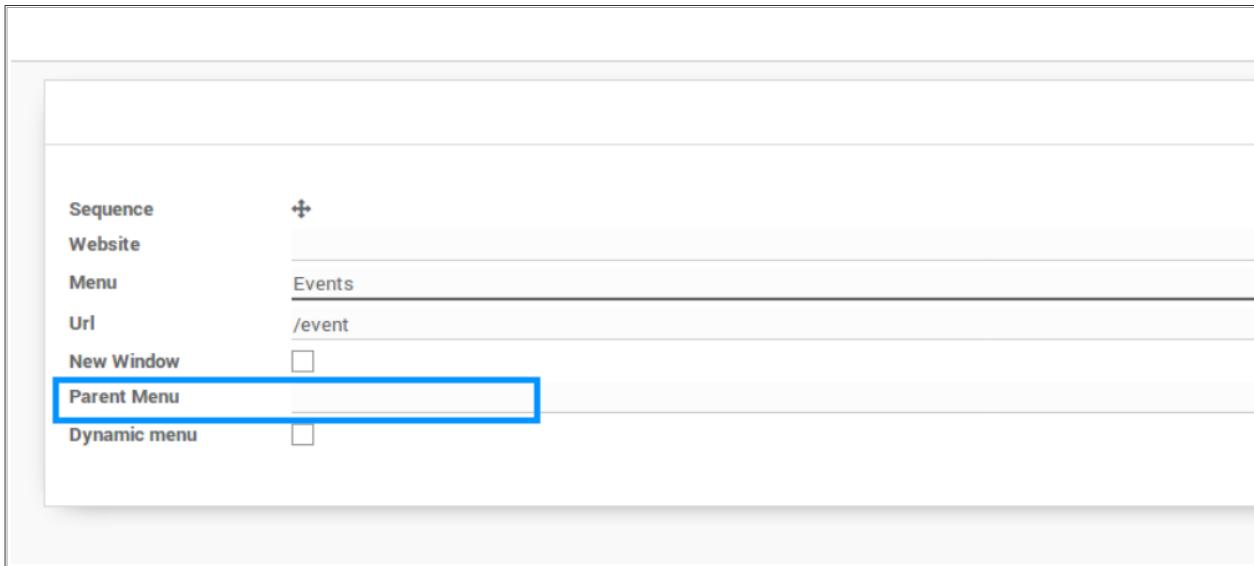

Action ▾

Design Menu

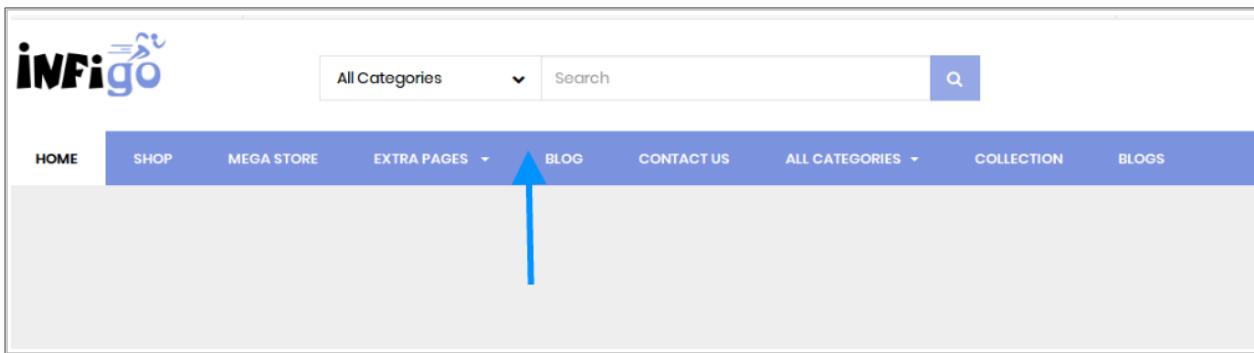

Sequence	+
Website	
Menu	Events
Add	
New Window	<input type="checkbox"/>
Parent Menu	<input type="checkbox"/> Top Menu
Dynamic menu	<input type="checkbox"/>

Open the Menu in Edit form and remove it's parent menu. Save the Changes.

By doing this the Menu will be deactivated at your Web Page.

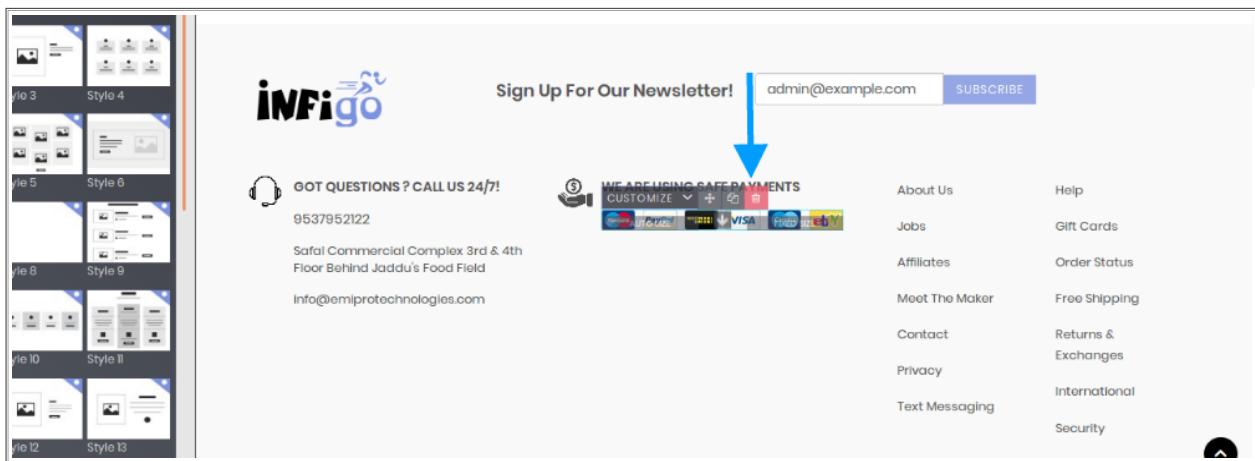

NOTE If you would like to Activate the Menu again you just need to add the parent menu and the Menu will be Available at your Web Page.

Footer

1. Remove Payment Icon and activate your custom Payment Gateway Icons

To Remove Payment icons from the footer, **Edit** the page and go to footer. Click on the payment icons and it will show customize options. Delete the static payment icons from there.

Now Go to (Odoo's Backend View) **Sales --> Configuration --> Sales Orders --> Payment Acquirers.**

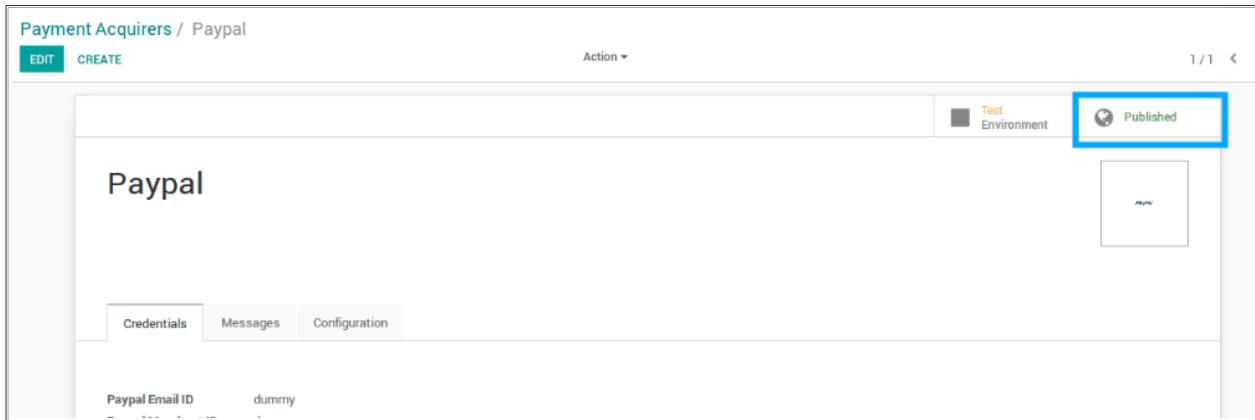

The screenshot shows the Odoo backend interface under the 'Sales' configuration. The 'Payment Acquirers' section is active. A context menu is open, showing options like 'Settings', 'Sales Channels', 'Sales Orders', 'Quotation Templates', 'Payment Acquirers' (which is highlighted with a blue box), 'Delivery Methods', 'Products', 'Attributes', and 'Attribute Values'. To the right, there are cards for 'Paypal' and 'Authorize.net', each with a brief description and a 'FIGURE' button. Below these cards is an 'ingenico' card with a 'TEST' button and an 'INSTALL' button.

Install your suitable payment acquirers.

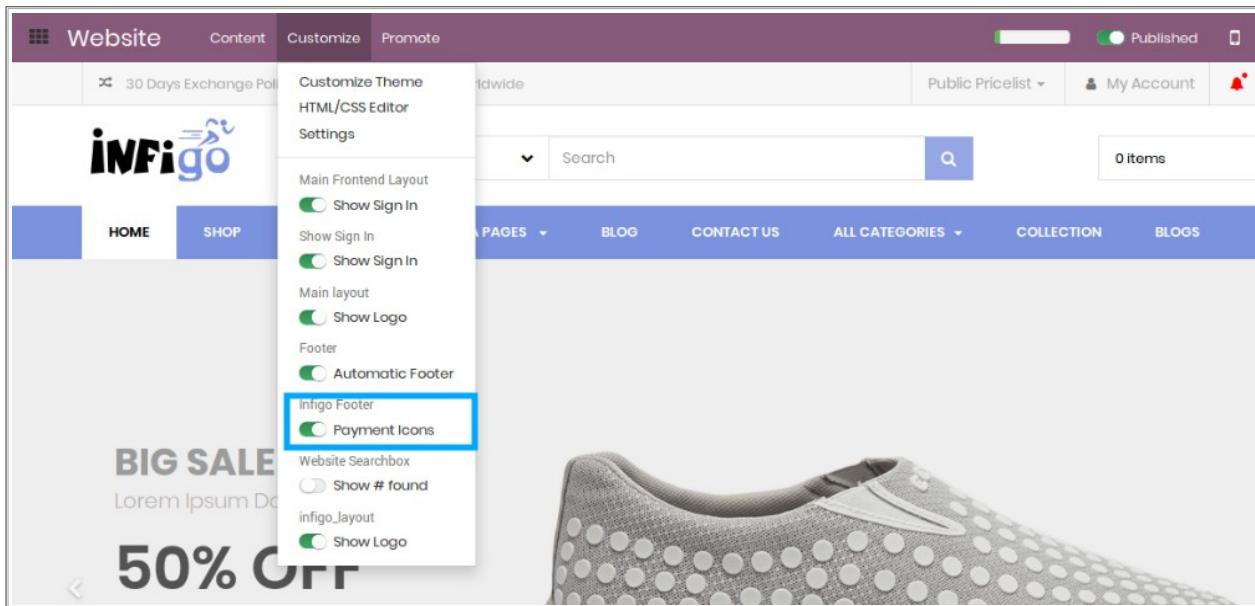

This screenshot shows the 'Payment Acquirers' list view. It includes cards for 'Wire Transfer', 'Paypal', 'Ingenico', and 'Authorize.net'. The 'Paypal' card is highlighted with a blue box around its 'INSTALL' button. Each card provides a brief description and a list of supported features (e.g., Online Payment, Payment Status Tracking, Subscriptions, Save Cards).

By installing any payment acquirer, You will be redirect to one form view. Click on **off** button stated right hand side and make your payment method publish.

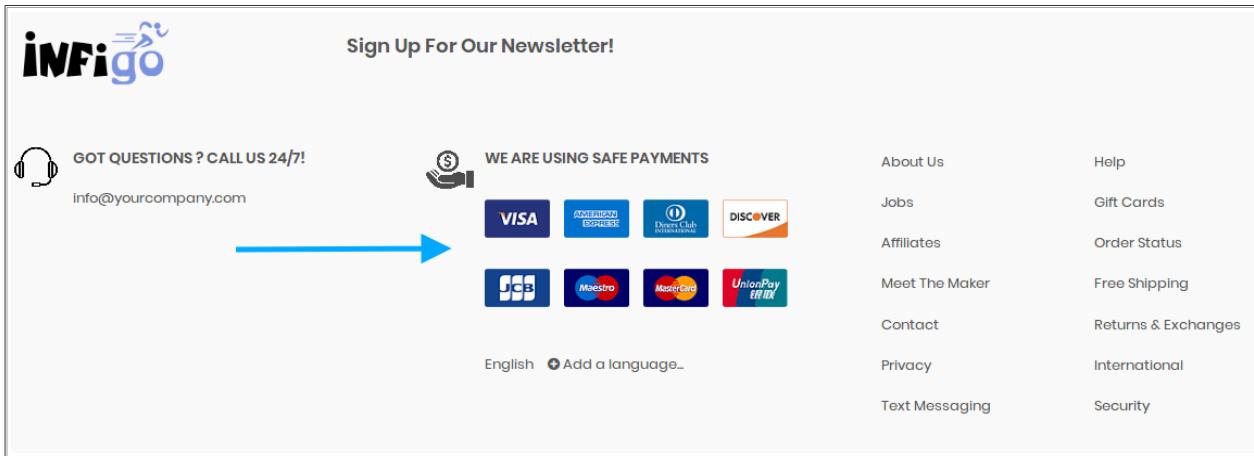

Now go to Webpage and click on customize menu. Activate **Payment Icons** from customize options.

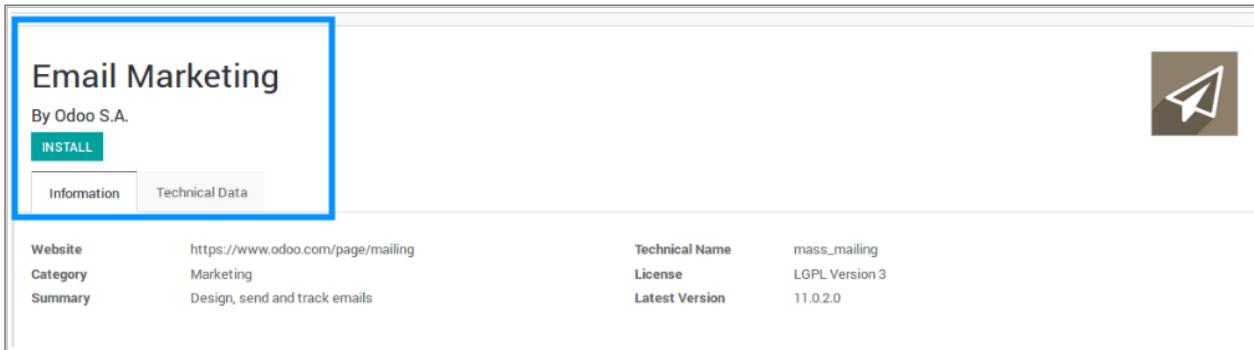

Doing this your payment icons will be visible at Footer.

2. Set up Newsletter

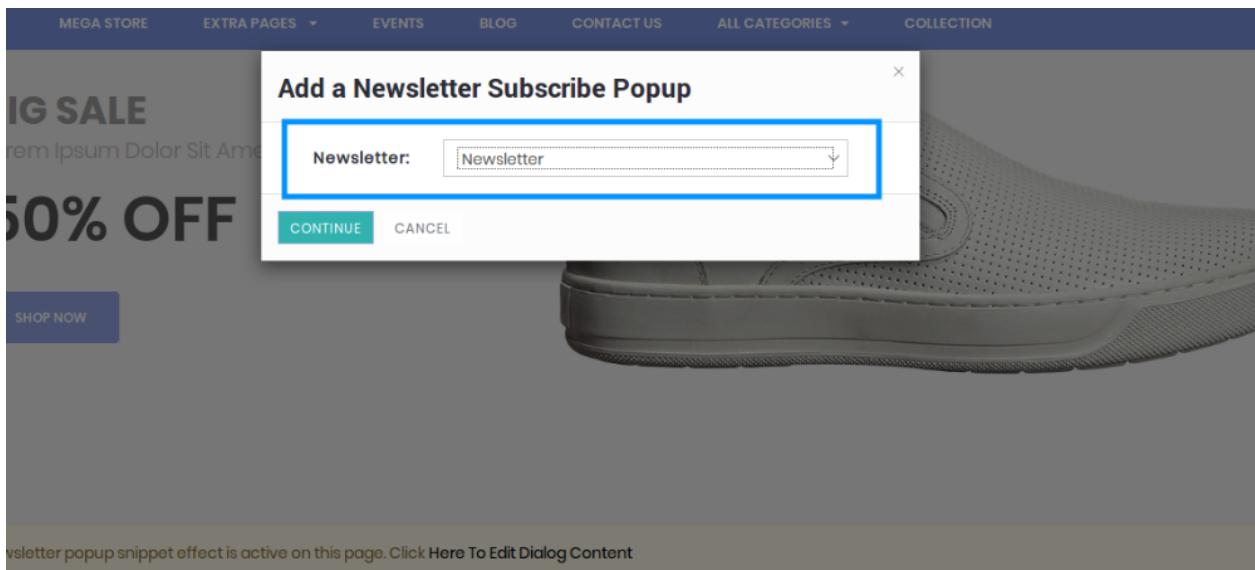

To Setup Newsletter for Infigo, Install the Module **mass_mailing**.

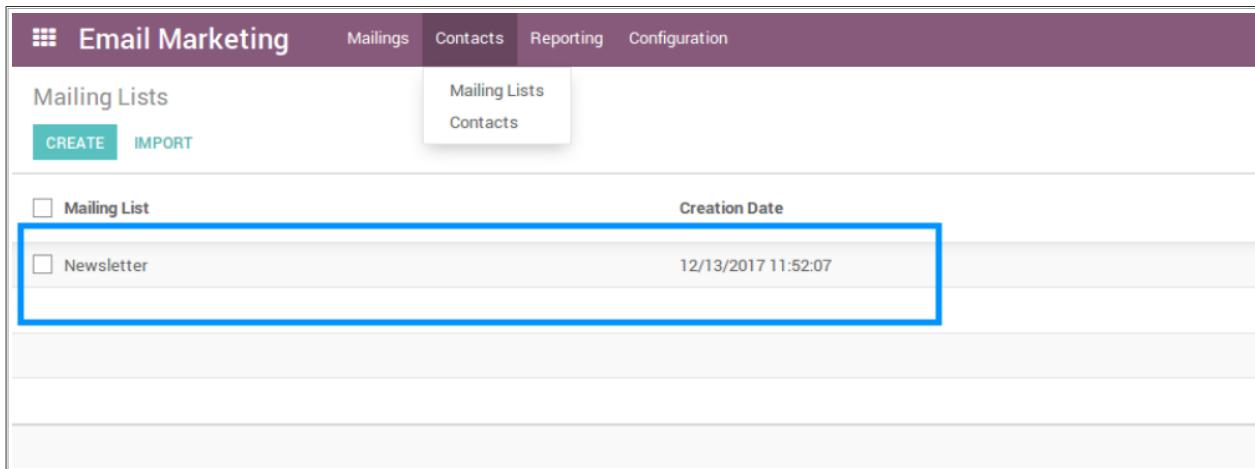

After installing the Module Go to **Email Marketing --> Settings** and activate **Website Popup**. Save the changes.

Doing this a new Snippet named **Newsletter Popup** will be visible under **Feature Section** in your Web Page.

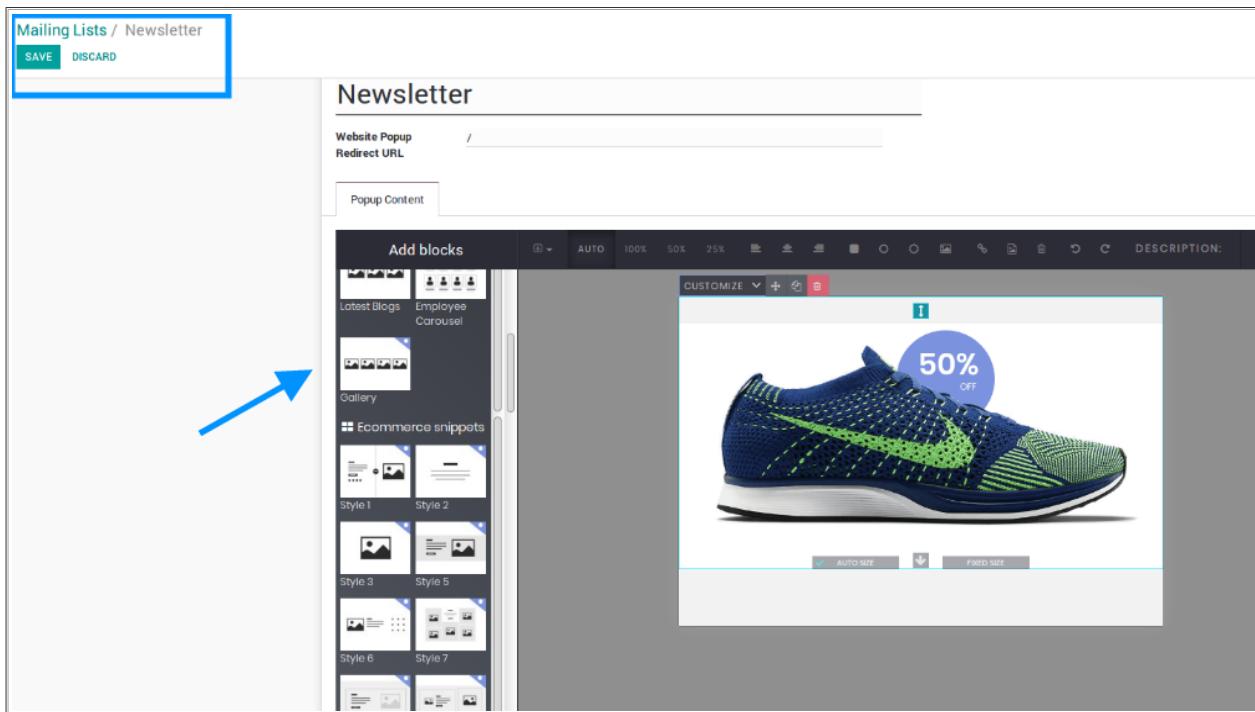

Drag and Drop the available **Newsletter Popup Snippet** in your Web Page. A pop up will appear like **Add a Newsletter Subscribe Popup** asking you to select Newsletter Type. Select the type as Newsletter. Click On Continue and Save the Web Page

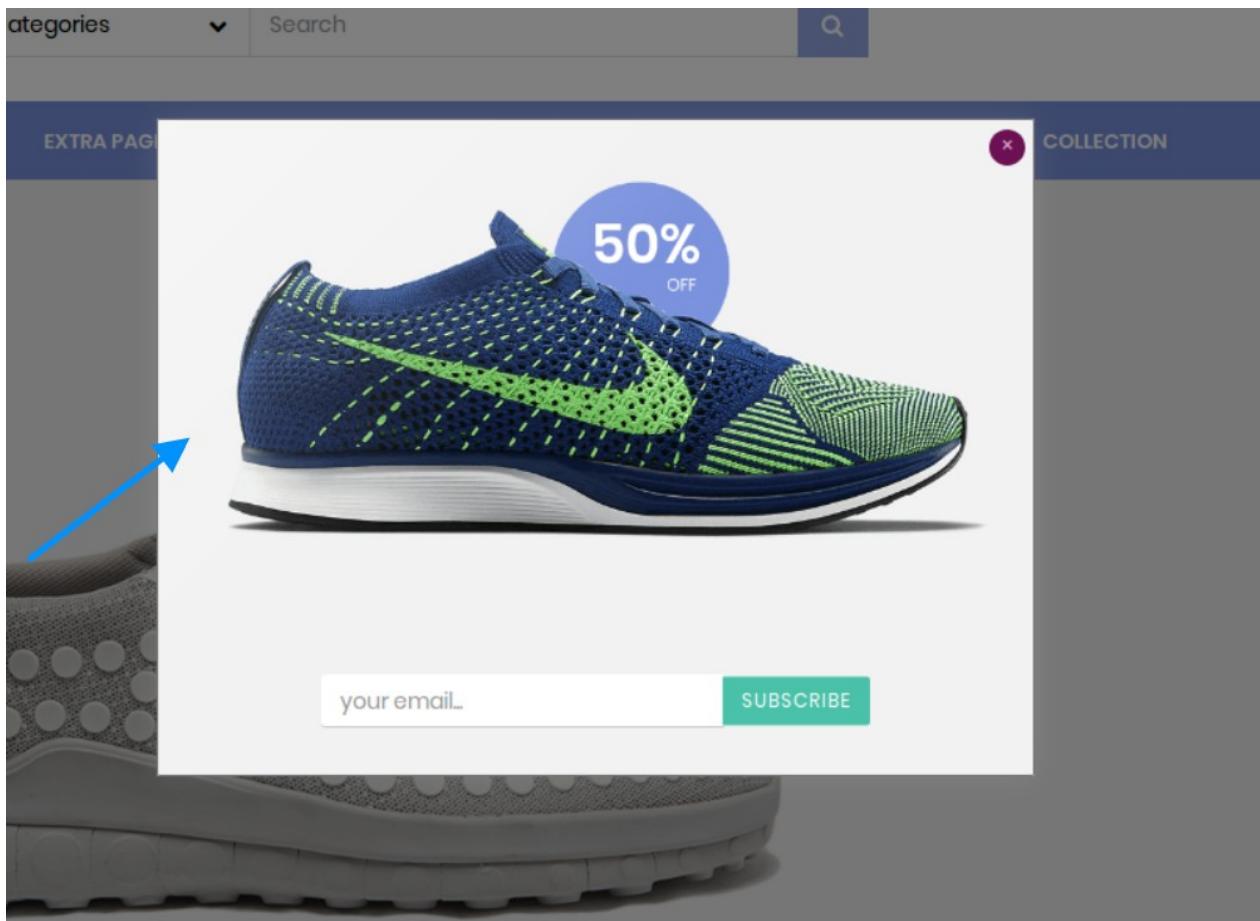

Now Go to (Odoo's Backend View) **Email Marketing --> Contacts --> Mailing Lists**. A record for Newsletter will be visible.

Open the Record In Editable form. From here using the Web Page Snippets you can Desing your Newsletter Pop Up the Way you want. Save the Changes.

By Doing so, the Designed Newsletter Pop up will be Visible in your Web Page.

Category Page

1. Set up Brands

To Set Up Brand go to **Website --> Configuration --> Brand**.

The screenshot shows the Odoo website configuration menu. The top navigation bar includes links for Website, Dashboard, Orders, Catalog, Blog, Portfolio, Reporting, and Configuration. The Configuration link is highlighted with a blue box. A dropdown menu for Configuration is open, showing options like Brand, Website Carousel Filter, Website Carousel Multi Filter, Website Menu Configuration, Website Notification, Wishlist, Settings, eCommerce, Product Label, Payment Acquirers, Delivery Methods, Products, eCommerce Categories, Attributes, and Attribute Values. The 'Brand' option is also highlighted with a blue box.

Create a new Record of Brand. Make sure that you have activated **Website Published**.

Save the changes.

The screenshot shows the Odoo Brand creation screen. The top navigation bar includes links for Website, Dashboard, Orders, Catalog, Blog, Portfolio, Reporting, and Configuration. Below it, a breadcrumb trail shows 'Brand / Corndell'. There are 'EDIT' and 'CREATE' buttons. A modal window is open, showing a form with a 'Name' field containing 'Corndell' and a 'Website Published' checkbox which is checked. A blue arrow points to the 'Website Published' checkbox.

Now to set the Brand to particular Product go to **Sales --> Catalog --> Products** and open the Product where you want to set the Brand. Go to **Sales** tab and search for **Sale Brand** label there the options for Brand will be visible which is created by you. Select one brand which you would like to set for Product and Save the changes.

The screenshot shows the Odoo product management interface for a product named "Bata Women Red Flats". The top navigation bar has tabs for "General Information", "Variants", "Sales" (which is highlighted with a blue box), "Inventory", "Invoicing", "Notes", and "Images". Below the tabs, there are sections for "Website", "Sale Label", "Alternative Products", "Accessory Products", "Optional Products", "Inventory Availability", "Availability Threshold", "Styles", "Alternate Image", "Events", and "Product Video". The "Sale Label" section shows a dropdown menu with "Fresh" selected. The "Sale Brand" section shows a dropdown menu with "Corndell" selected, indicated by a blue arrow pointing to the dropdown button. A blue box highlights the "Products / Bata Women Red Flats" title bar.

Now go to your Web Page. There the Brand Filter will be available in the Filter Section of Shop Page. On Selecting that brand it will search for the Appropriate Product.

2. Set up Product Label

To Set Up Product Label go to **Website --> Configuration --> eCommerce --> Product Label.**

The screenshot shows the Odoo Website Configuration interface. The top navigation bar includes 'Website', 'Dashboard', 'Orders', 'Catalog', 'Blog', 'Portfolio', 'Reporting', 'Configuration' (selected), and a dropdown menu. The 'Product Label' section is visible, featuring a 'CREATE' button and a 'IMPORT' button. A sidebar on the right lists various configuration options, with 'Product Label' highlighted by a blue box.

Create a new Record of Label. Save the changes

The screenshot shows the 'Product Label / Sale' creation interface. It features a 'EDIT' and 'CREATE' button. A table is present with columns 'Name' and 'Sale'. The entire table area is highlighted with a blue box.

Now to set the Label to particular Product go to **Sales --> Catalog --> Products** and open the Product where you want to set the Label. Go to **Sales** tab and search for **Sale Label** label there the options for Label will be visible which is created by you. Select one label which you would like to set for Product and Save the changes.

3. Set up Alternative Image for Product

To Set the Alternate Image for Product go to **Sales --> Catalog --> Products** and open the Product where you want to set the Alternate Image. There you will find **Alternative Image** under **Sales Tab**. There you can set alternate Image of your main Product.

The screenshot shows the Odoo product edit screen for 'Epic Ink Aviator Sunglasses'. The top navigation bar has tabs: General Information, Variants, Sales (which is highlighted with a blue box), Inventory, Invoicing, Notes, and Images. Under the Sales tab, there are sections for Website, Sale Label, Alternative Products, Accessory Products, Optional Products, Inventory Availability, Availability Threshold, Alternate Image, Events, and Product Video. The 'Alternate Image' section is also highlighted with a blue box. The 'Sale Label' section contains 'Sale Label' and 'Sale Label'. The 'Alternative Products' section lists 'Footrendz Women Khaki:', '[TP1002] Hupshy Round Sunglasses', and 'Myra Women Black Flats'. The 'Accessory Products' section lists 'SUPERRAY Round Sunglasses', 'Crocs Women Cerulean Blue Flats', and 'Digni Women Gold Heels'. The 'Inventory Availability' section has a note about preventing sales if stock is low. The 'Availability Threshold' is set to 5.00. The 'Events' section has a checkbox for 'Is an Event Ticket' which is unchecked. The 'Product Video' section is empty.

Now go to your Web Page in Shop, hover on the Product for which you had set Alternative Image

4. Set up Category wise common Product Attributes

To set Category wise common Product Attributes go to (Odoo's Backend View) **Website**

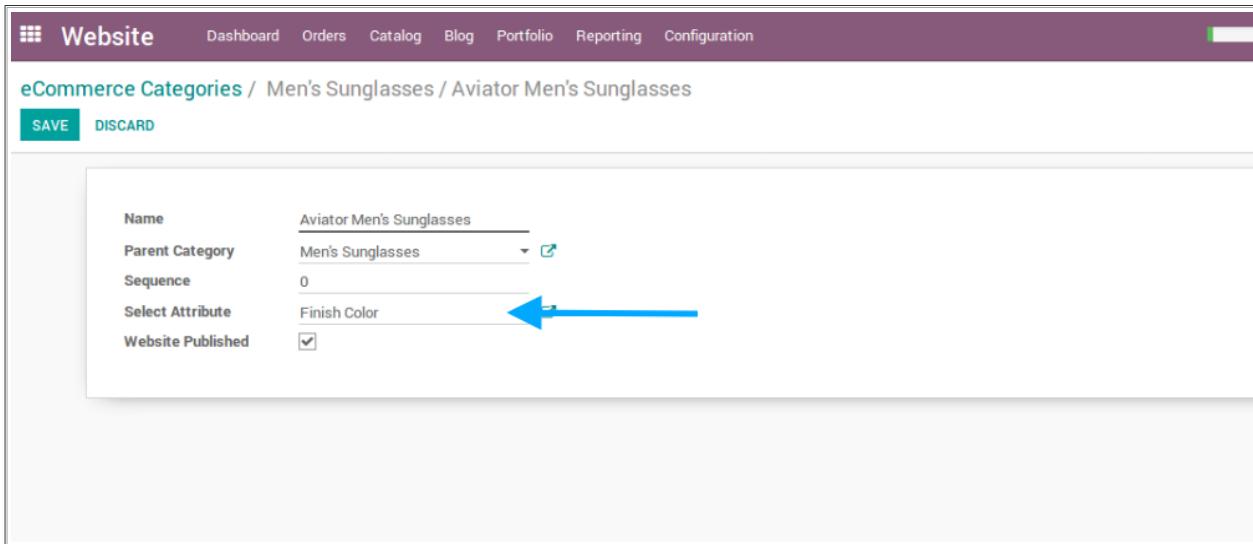

--> **Configuration --> Products --> eCommerce Categories**

The screenshot shows the Emipro Theme Infigo dashboard. On the left, there's a chart titled "SALES SINCE LAST WEEK" showing revenue over time. On the right, there's a sidebar with various configuration options under "Configuration". A dropdown menu is open, showing "eCommerce Categories" highlighted with a blue border. Other options in the menu include Brand, Website Carousel Filter, Website Menu Configuration, Website Notification, Wishlist, Settings, eCommerce, Product Label, Payment Acquirers, Delivery Methods, Products, Attributes, Attribute Values, and Attribute Categories.

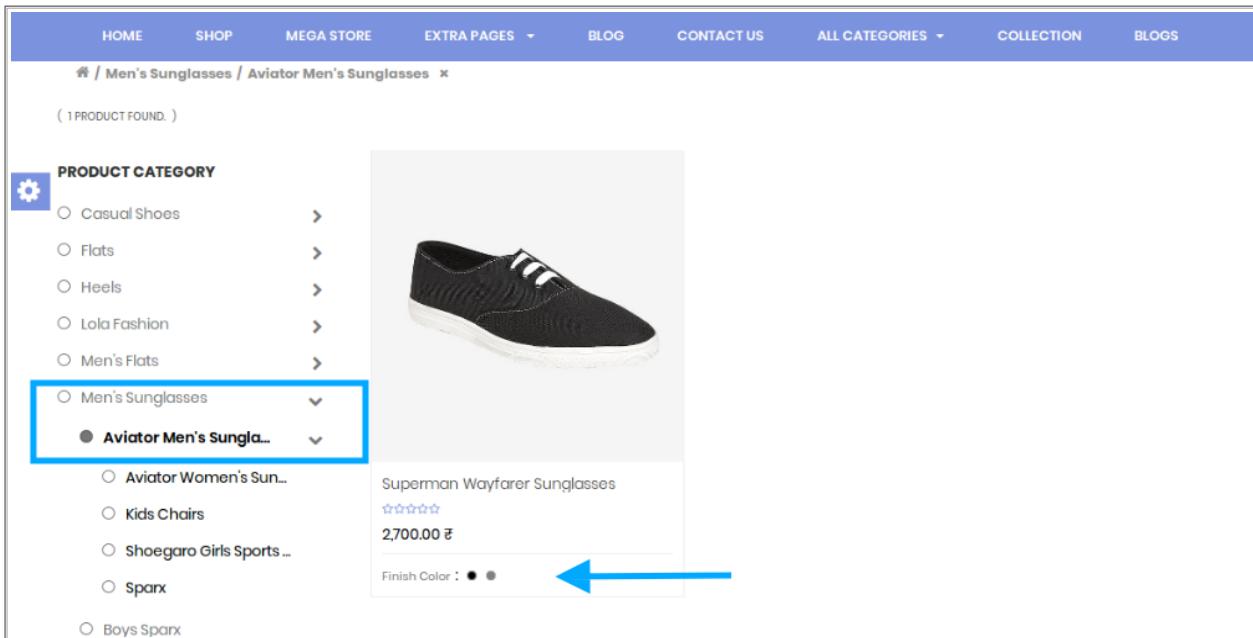

Select any category in which you want to set specific attribute.

The screenshot shows the "eCommerce Categories" list view. It includes a search bar, a "CREATE" button, and a "IMPORT" button. The list itself contains several categories, with the first one, "Men's Sunglasses / Aviator Men's Sunglasses", highlighted by a blue arrow pointing to it.

By selecting category, One form view will open. **Edit** the form view and set your attribute. Save your changes.

Go to Webpage . In shop, Select category in which you have set attribute. Now you can see the attribute visible for specific category.

5. Set Individual Description per each Category

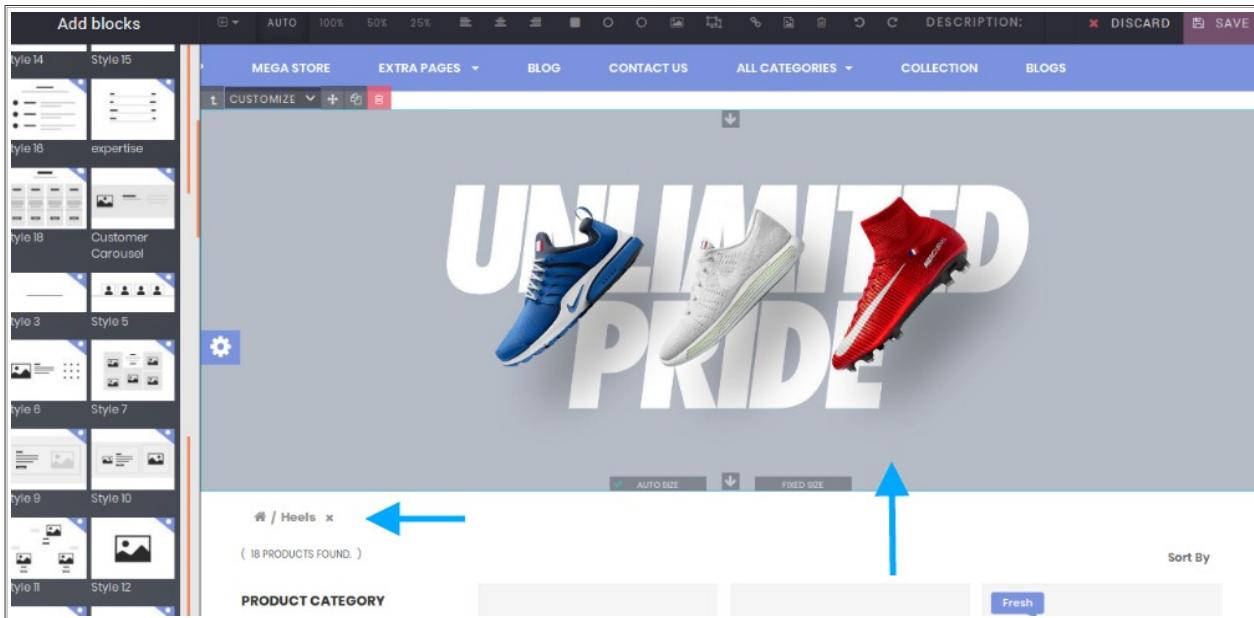

Static image banner for shop is common for all category. You will get individual description for only those category in which you will drag and drop any snippet. You can also remove that static banner as per your need.

Select any category from shop.

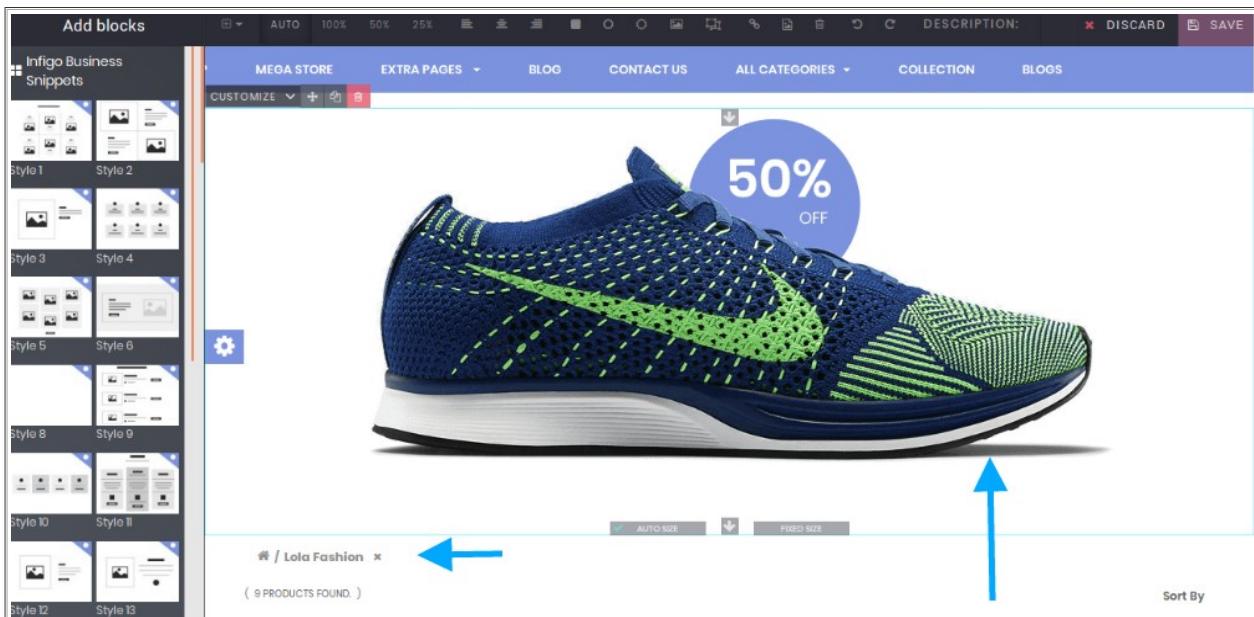

The screenshot shows the Odoo Infigo theme editor interface. On the left, there's a sidebar titled 'Add blocks' with a section for 'Infigo Business Snippets' containing various style options labeled Style 1 through Style 11. The main content area displays a breadcrumb navigation path: MEGA STORE / Heels. Below this, it says '(18 PRODUCTS FOUND.)'. A dropdown menu titled 'PRODUCT CATEGORY' is open, showing categories like Casual Shoes, Flats, and Heels, with 'Heels' selected. To the right, there are three product cards: 1. Shopping Station Women Blue ... (blue casual shoe) 2. Shopping World Women Multi... (black casual shoe) 3. Beta Women Red Flats (blue sunglasses). Each card includes a star rating, price, and color information.

Edit the page. Drag and drop snippet suitable for that category above the breadcrumb.

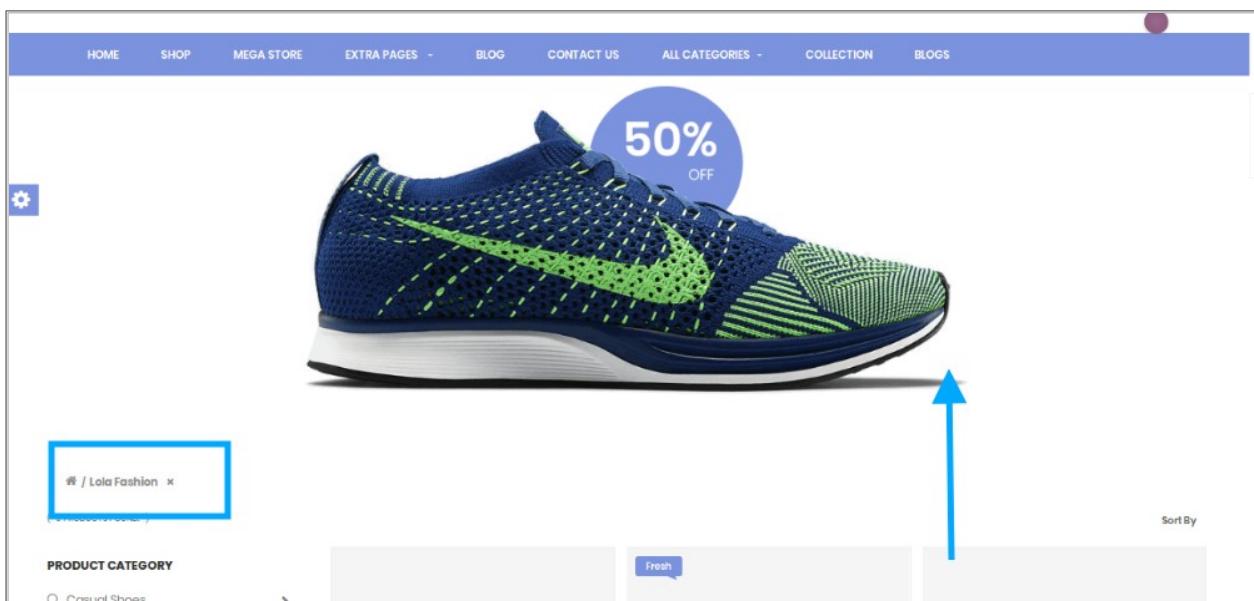

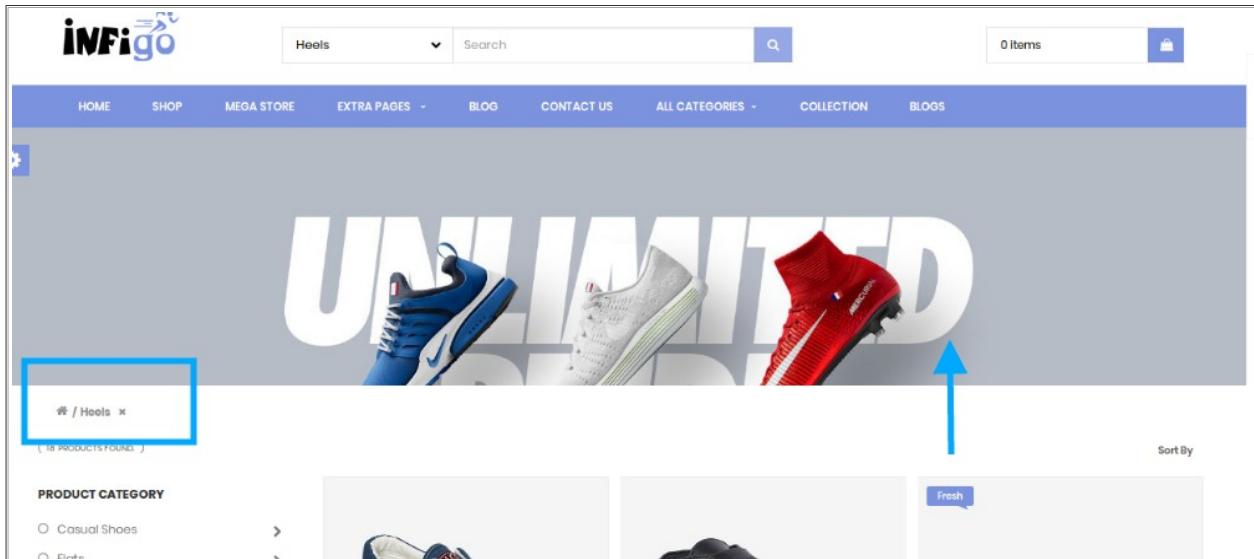

Save your changes.

Then go to another category. Drag and drop some other snippet and save it.

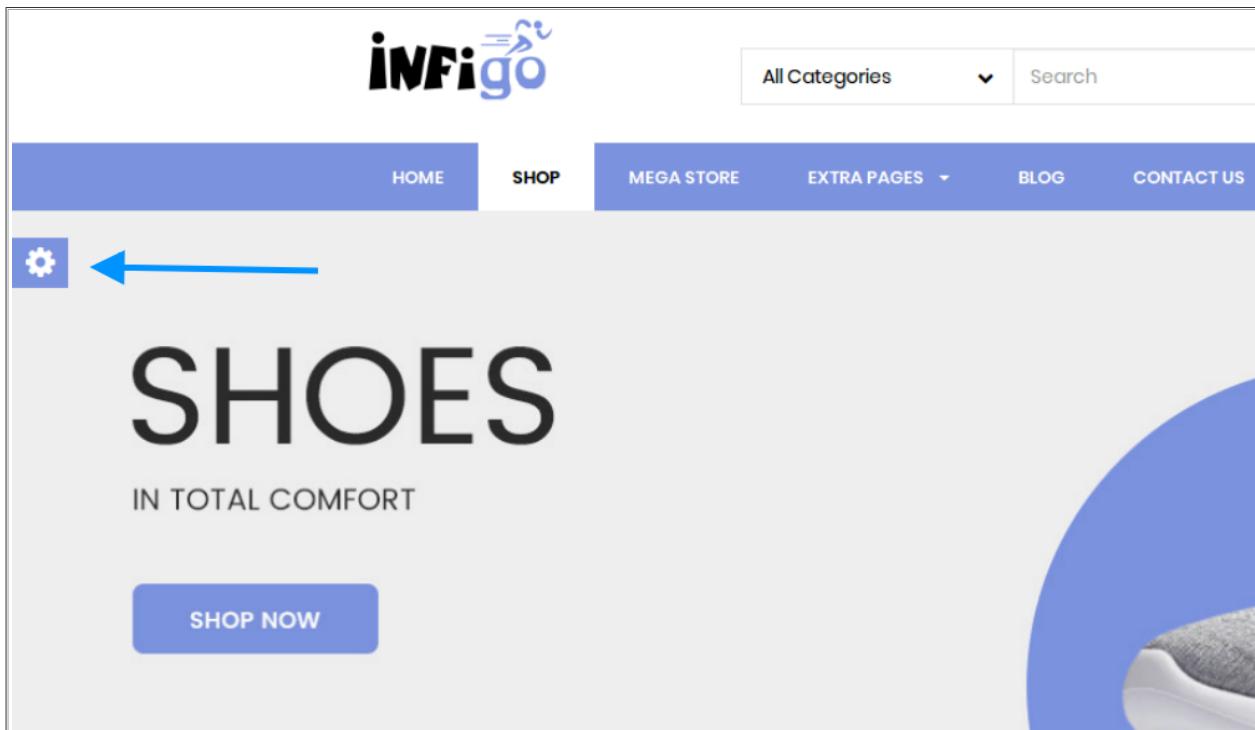

Now , you will get your category wise banner or description in shop.

6. Customise Shop Page

On Installing **theme_infigo** there will be button visible in shop page for customise option. On clicking that button a pop up window will open where you will find different configuration related to Product.

You can set the configuration of Product and on clicking on **Apply** button the setting made by you will be saved and you will get the desired output.

CUSTOMIZE OPTION

To the right, there's a preview of a product card for "Shopping Station Women Blue Flats". The card includes a thumbnail image of a blue flat, a "QUICK VIEW" button, a price of "26,990.00 ₹", and a "Sale" badge.

If you have disabled any Settings from **Customise Menu** than that option will get deactivated from **Customise Shop Option**

The screenshot shows the Odoo website builder interface. At the top, there are tabs: Website, Content, Customize, and Promote. On the left, there's a sidebar with a gear icon labeled "Customize". The main area displays a product card for "Shopping Station Women Black Flats". The card includes a price of 26,990.00 ₹, a "Sale" badge, an image of the sunglasses, and a brief description. Below the card, there are several customization options listed in a sidebar, many of which are checked (indicated by green switches). A blue rectangular box highlights the "Infigo Wishlist" option, which is currently unchecked. Other options include Automatic Footer, Payment Icons, Website Searchbox, Show # found, Show Logo, Product Description, Add to Cart, Comparison List, Wishlist, Infigo Settings, Add to Cart, Comparison List, Similar Product, and Show Sort by.

This screenshot shows the "CUSTOMIZE OPTION" dialog box. It has a blue header bar with the title "CUSTOMIZE OPTION" and an "Apply" button. The main area contains several configuration sections, each with a dropdown menu:

- Text Align:** Set to "Left".
- Allow QuickView:** Set to "Allow".
- Box Border:** Set to "Allow".
- Show Label Style:** Set to "Allow".
- Allow Alternate Image:** Set to "Allow".
- Allow Attribute Category:** Set to "Allow".
- Allow Comparision:** Set to "Allow".
- Allow Similar Product:** Set to "Allow".

A blue rectangular box highlights the "Allow Similar Product" section.

[Click Here to see Video of this Feature.](#)

This settings is only visible to Admin. In List and Left Sidebar view of Product the Option of "Images to Show" will not be visible.

7. How to Deactivate Ajax Based Load More Items Button

On Installing theme_infigo, in Shop Page a button named **Load More** will be visible. On clicking that the Products will be loaded through Ajax as an alternative of Pager.

The screenshot shows a shop page with a grid of products. The products include various items such as shoes and sunglasses. Each product card displays the item name, price, and a small image. A blue arrow points from the bottom right towards the 'LOAD MORE' button at the bottom center of the page.

Product details shown in the grid:

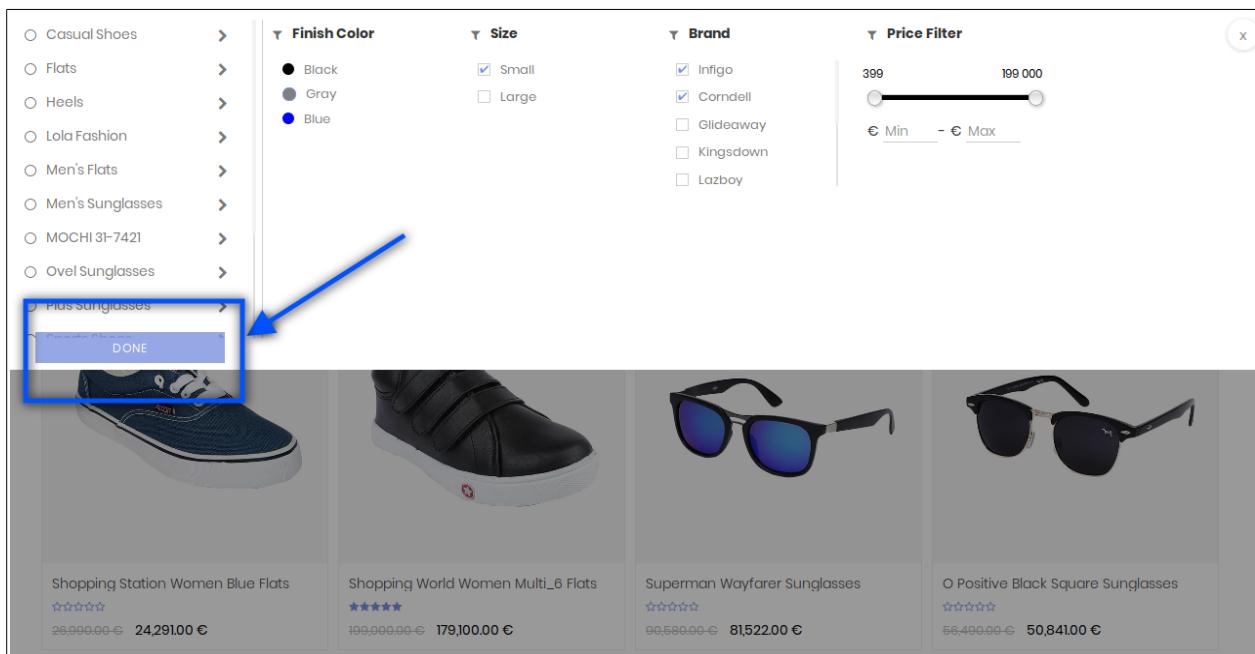

- Shopping Station Women Blue Flats: 24,291.00 €
- Shopping World Women Multi_6 Flats: 179,100.00 €
- Superman Wayfarer Sunglasses: 81,522.00 €
- O Positive Black Square Sunglasses: 50,841.00 €
- Crocs Women Oyster Flats: 5,309.10 €
- With The Fashion Women TAN Heels: 1049.10 €
- With The Fashion Women ORANGE Heels: 358.10 €
- With The Fashion Women CHERRY Flats: 4,801.50 €

At the bottom center of the page, there is a blue button labeled 'LOAD MORE (41 Products)'. A blue arrow points from the bottom right towards this button.

If you want to Deactivate the Ajax way of loading Products and activate pager again than you need to uninstall the module. To uninstall the module go to **theme_infigo --> __manifest__.py** file and comment the module **infigo_shop_load_products**. Restart the Odoo Instance and Update Module List and try uninstalling the module. Once the Module is uninstalled the default Odoo's Pager will be visible for Shop Page.

8. Activate Product Searching in one time by selecting multi options in Filter

As per default Odoo functionality, selecting any Attribute option in Filter section, will immidiately go for search of appropriate products regardless of this if you want to apply other attribute option at the same time. On Installing theme_infigo, there will be **Done** button visible in Shop page which will change the default Odoo feature by allowing you to select multiple attribute options at the same time and go for search by clicking on it.

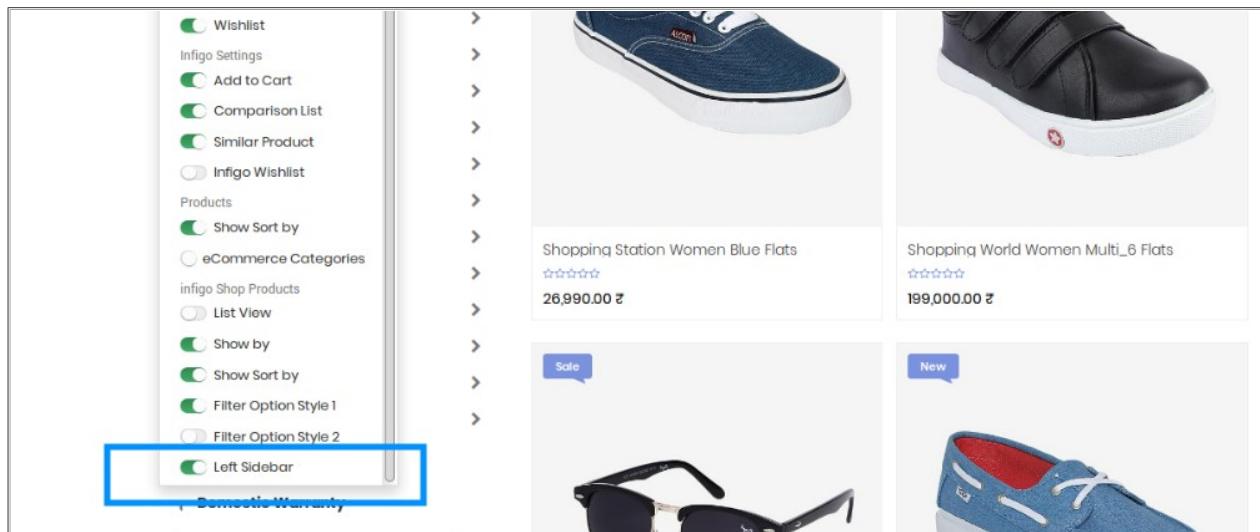

To Deactivate the **Done** Functionality go to **theme_infigo --> __manifest__.py** file and comment the module **attribute_style_2**. Restart the odoo Instance, Update Module List

and uninstall the module. The Done functionality will be deactivated and Odoo's default functionality will be activated.

9. Activate Left Sidebar View

To Activate Left Side bar View of Products in Shop Page go to **Customise** and activate **Left Sidebar**.

10. Change Image of Login Popup in Wishlist

On Installing Infigo, to add Products to Wishlist the user will be asked to Login if he is a Public User (Not Signed in) and the pop up for Login will appear which will ask user to Sign In or Sign Up. So to change the Image of Login Pop up go to **Website --> Configuration --> Settings** there you will find a label named **Wishlist Login Image**. Upload the image which you would like to display to your customers during login and Save the changes.

Go to Web Page and try to login with Public User login pop up will be displayed containing the Image you have set at Odoo's backend.

Product Comparison Page

1. Add extra specification to any Product

To Set Extra Specification of any product Go to **Website --> Configuration --> Settings** and activate **Attributes and Variants**.

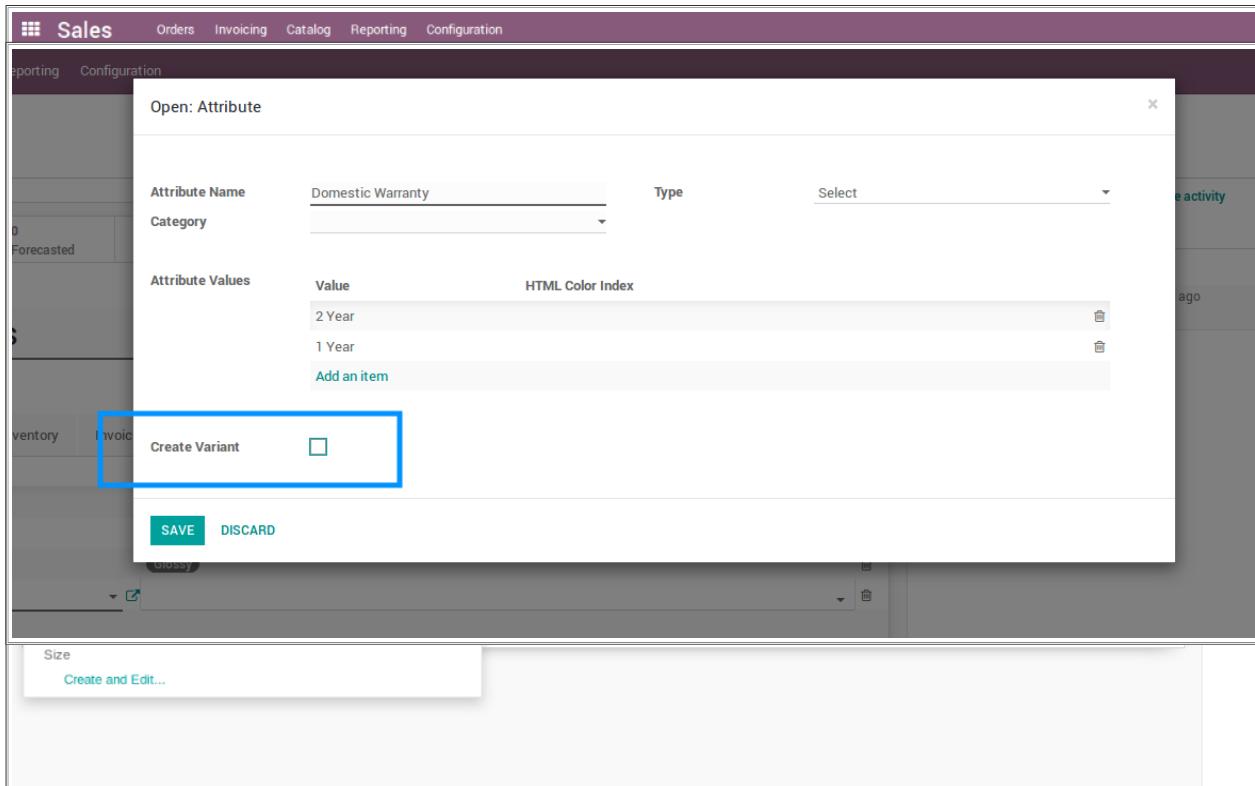

The screenshot shows the Odoo Website configuration interface. On the left is a sidebar with 'Events', 'Employees', and 'General Settings'. The main menu has tabs: Dashboard, Orders, Catalog, Blog, Portfolio, Reporting, Configuration (which is selected), and a dropdown menu. Under Configuration, there are sections for Brand, Website Carousel Filter, Website Menu Configuration, Website Notification, Wishlist, eCommerce, and Products. A blue arrow points from the 'Attributes and Variants' section in the 'Product Catalog' area to the 'Settings' section in the sidebar.

Now go to **Sales --> Catalog --> Products** and open the Product where you want to set the Specification. Go to **Variants Tab**. Add the variant(attribute) that you would like to show them in Extra Specification. Make sure that you have deactivated the field **Create Variant**

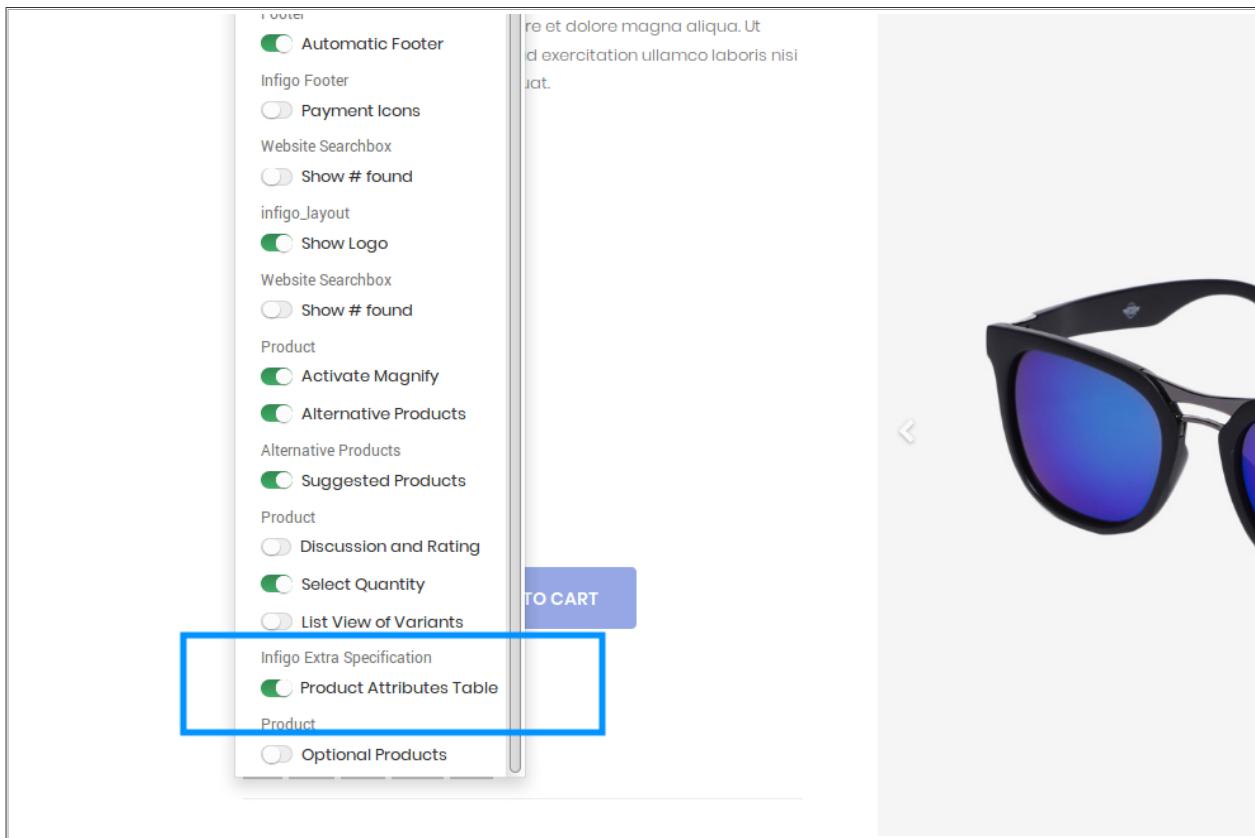

Make sure that you have activated the Developer mode

NOTE

Now to view the Extra Specification of Product in your Web Page you need to activate the **Product Attributes Table**

Now the variant(attribute) which has the **Create Variant** field deactivated will only be visible in Extra Specification of the product Page. It will not be visible alongwith the Product Attribute. So in your Web Page you can find the values of the Variants set for the Product.

Wishlist Page

1. Activate Notification Slider

To Activate Notification Slider for Wishlist Page go to **Website --> Configuration --> Website Notification**

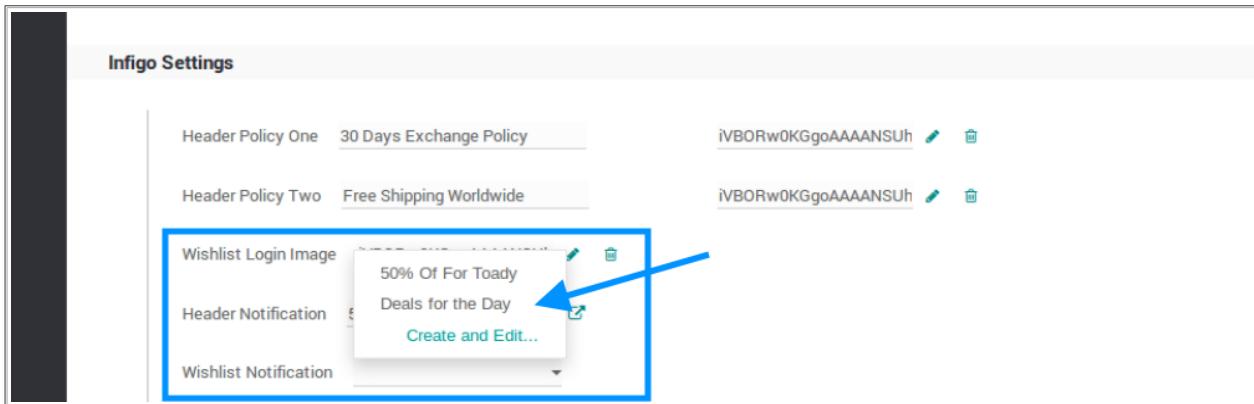

The screenshot shows the Odoo configuration interface. The top navigation bar has tabs for Website, Dashboard, Orders, Catalog, Blog, Portfolio, Reporting, and Configuration. The Configuration tab is selected. A sidebar on the left lists categories: Website Notification, CREATE, IMPORT, Name, and 50% Off For Toady. A dropdown menu on the right lists various configuration items, with 'Website Notification' highlighted by a blue box.

Create a new Record for Notification by giving appropriate name and selecting the products which you would like to show as a notification products in Wishlist Page.

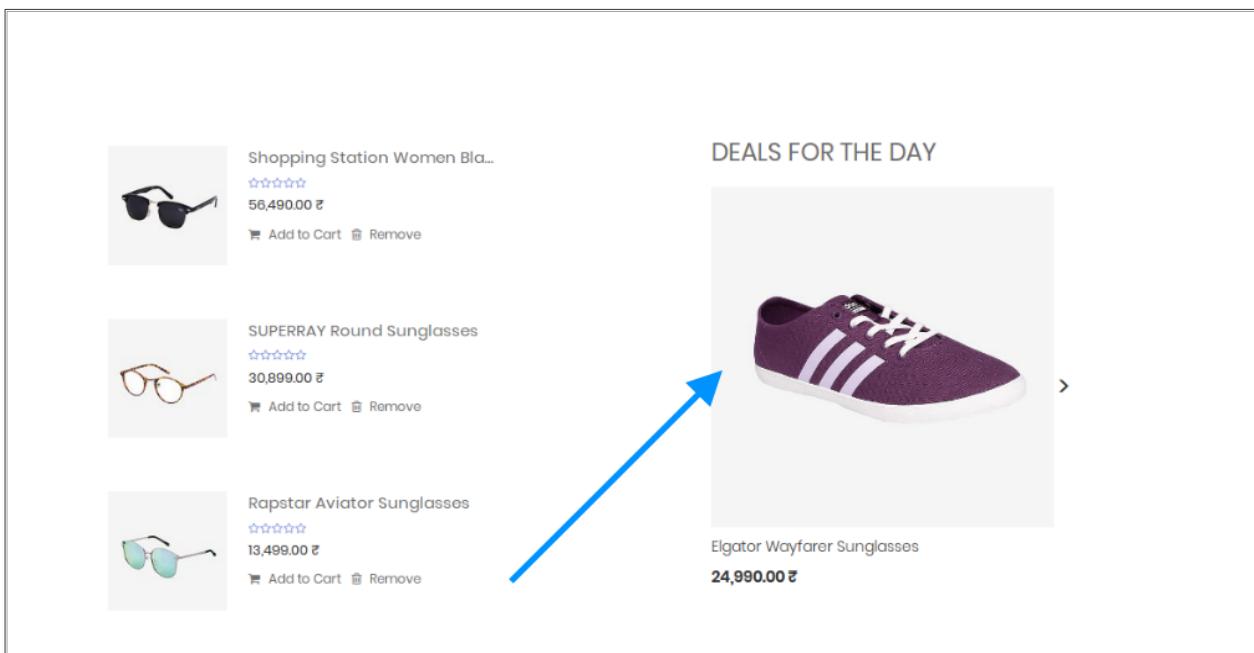

The screenshot shows the 'Deals for the Day' notification creation screen. It has fields for Name (Deals for the Day) and Product ([TP1001] Eligator Wayfarer Sunglas... [TP1001G] Rapstar Aviator Sunglas... [TP1002] Hupshy Round Sunglasses). A blue arrow points to the product selection field. A dropdown menu is open, listing products: [Delivery] Free delivery charges, [TP101] Shopping Station Women Black Flats, 5 Intensive Days, Aligator Aviator Sunglasses, Barabik Wayfarer Sunglasses, Bata Women Red Flats (2 Year, Black, Small), Bata Women Red Flats (1 Year, Black, Small), and a 'Search More...' button.

Now go to **Website --> Configuration --> Settings** There you will find **Wishlist**

Notification where the created Notification Record will be visible. You can select any any record of notification that you want to show in Wishlist Page.

Add Items to wishlist and view Wishlist Page the Selected Products Slider will be visible.

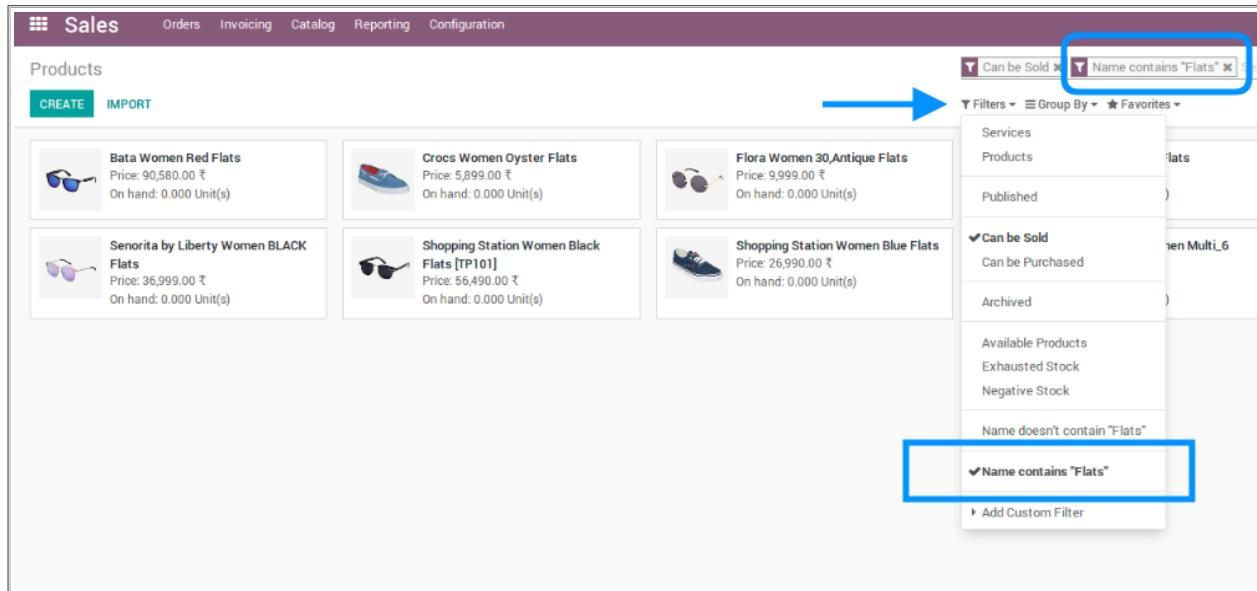

[Click Here to see video of this process.](#)

Carousel

1. Product Carousel

For Creating Product Carousel Make a filter of Products. For making Products Filter go to menu **Sales --> Catalog --> Products** and make the filter of products.

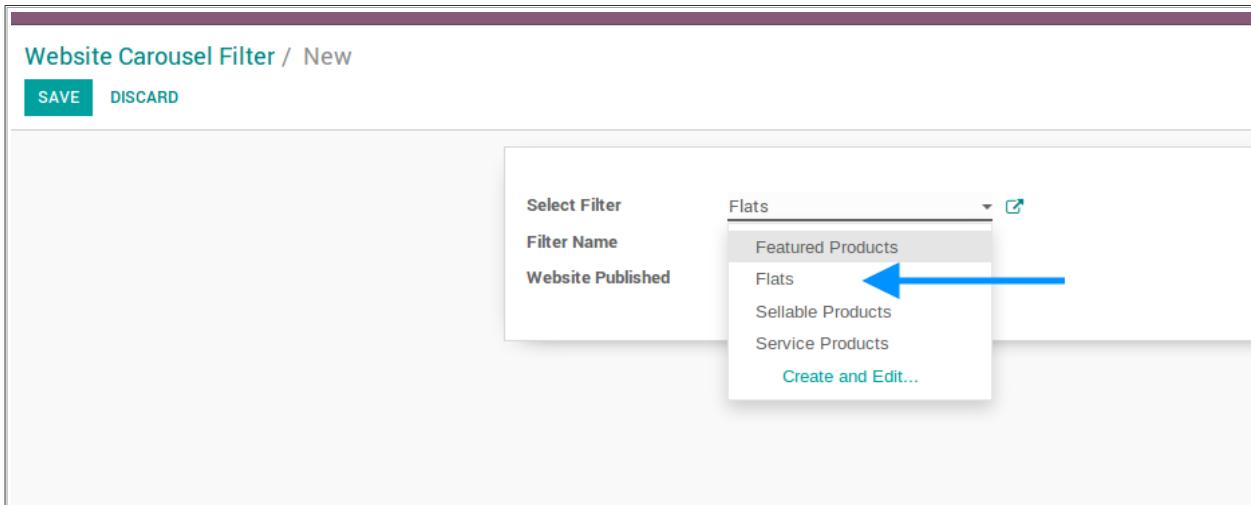

Now save the Created Filter to **Favorites**, give the appropriate name of the Filter and activate **Share with all users option**. Save the changes.

The screenshot shows a list of products in a search results page. At the top, there are filters: "Can be Sold" and "Name contains 'Flats'". Below the filters, there are buttons for "Filters", "Group By", and "Favorites". A modal window is open, titled "Save current search". Inside the modal, there is a text input field containing "Flats", a checkbox for "Use by default" which is unchecked, and another checkbox for "Share with all users" which is checked. A blue arrow points from the "SAVE" button at the bottom right of the modal towards the "SAVE" button on the main interface.

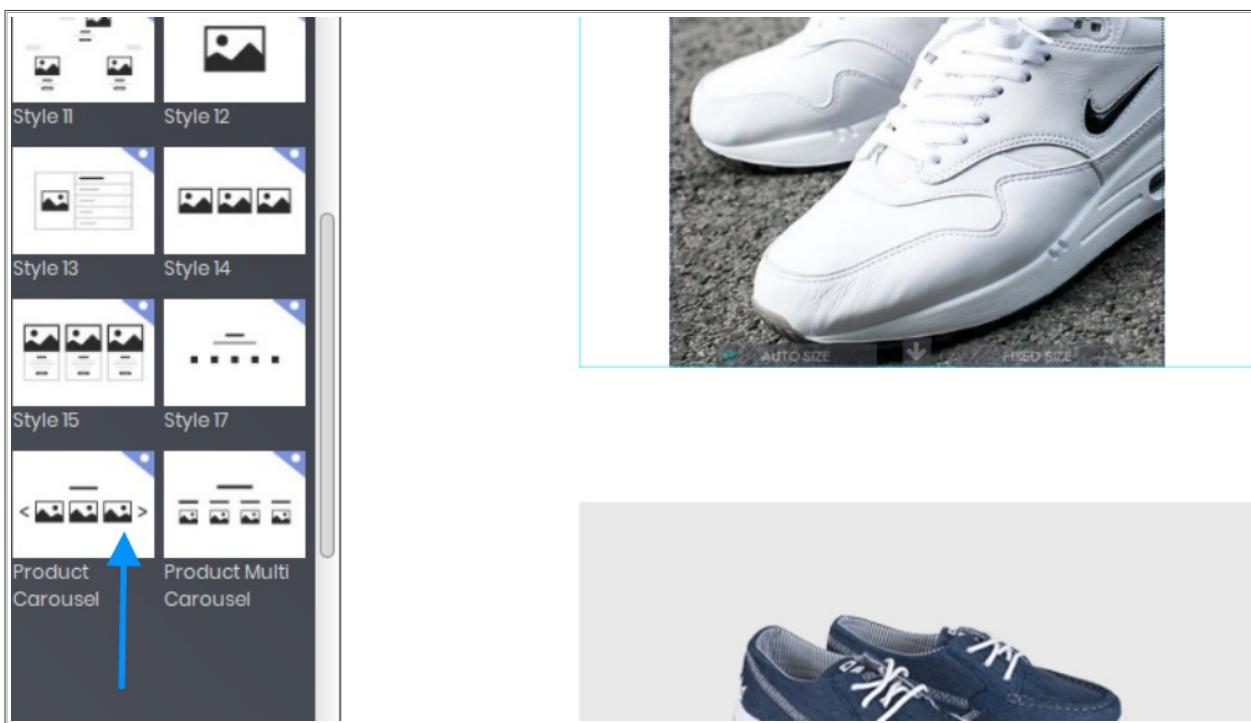

Now go to **Website --> Configuration --> Website Carousel Filter**.

The screenshot shows the "Website Carousel Filter" creation screen. At the top, there is a navigation bar with "Website", "Dashboard", "Orders", "Catalog", "Blog", "Portfolio", "Reporting", and "Configuration". The "Configuration" tab is active. Below the navigation, there is a sub-navigation bar with "Website Carousel Filter", "Website Carousel Multi Filter", "Website Menu Configuration", "Website Notification", "Wishlist", "Settings", "eCommerce", "Product Label", "Payment Acquirers", "Delivery Methods", "Products", "eCommerce Categories", and "Attributes". The "Website Carousel Filter" option is highlighted with a blue box. On the left, there are two buttons: "CREATE" (in green) and "IMPORT" (in light blue). Below these buttons, there is a section for "Filter Name" with a checkbox. To the right of this section, there is a list of filter types: "service", "Sellable", and "Featured Products".

Create a new Record for Carousel. For which, the created filters in Product will be available for Selection. Select the Filter which you would like to display in your Web Page. Give name of the Filter and make sure to activate **Website Published**.

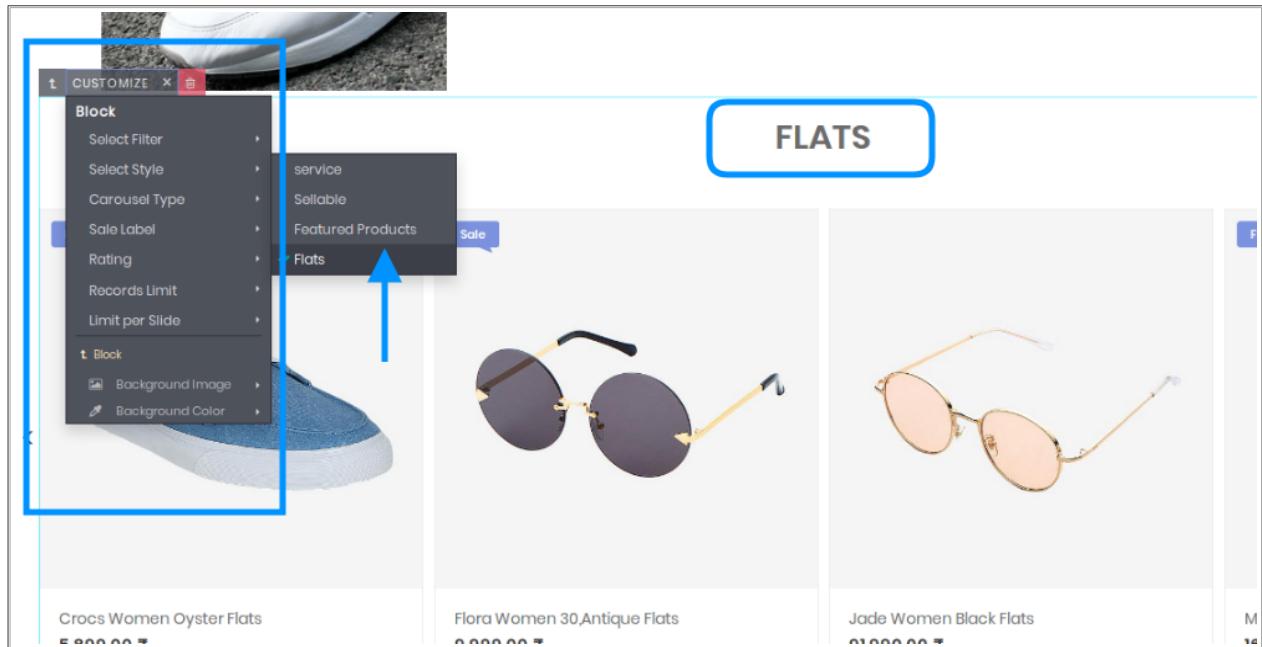

Now to make the Carousel Visible in your Web Page, Drag the Snippet **Product Carousel** available under **Ecommerce Snippets** Section.

On Dragging the snippet under **Customise Menu**, the option of **Select Filter** will be available. It will show the list of filters created at Odoo's backend under **Website Carousel Filter**. From the available filter at Web Page you can select the desired option

for your carousel. Alongwith the filter options many different options like activate Rating, Carousel Type, Sale Label, Different Styles, Records Limit, Limit Per Slide for Filter will be Visible.

NOTE If the Filter Options are not Visible than save your Web Page once and than again Edit the Web Page to see the Filter Options.

[Click Here to see video of this Feature.](#)

2. Multi Product Carousel

Follow Step 1. to create Product Carousel.

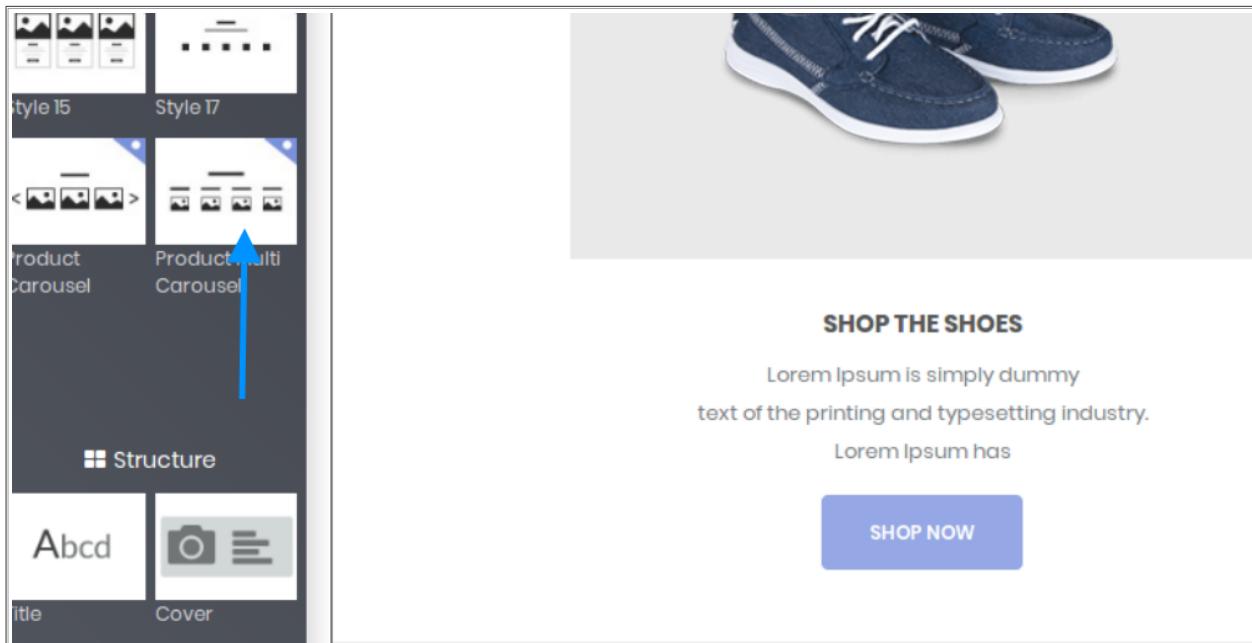

Now go to **Website --> Configuration --> Website Carousel Multi Filter**.

The screenshot shows the 'Configuration' tab selected in the top navigation bar. Under the 'Website' category, the 'Website Carousel Multi Filter' option is highlighted with a blue border. A tooltip-like box appears over this option, listing various configuration items: Brand, Website Carousel Filter, Website Carousel Multi Filter (which is also highlighted with a blue border), Website Menu Configuration, Website Notification, Wishlist, Settings, eCommerce, Product Label, Payment Acquirers, Delivery Methods, Products, eCommerce Categories, Attributes, Attribute Values, and Attribute Categories.

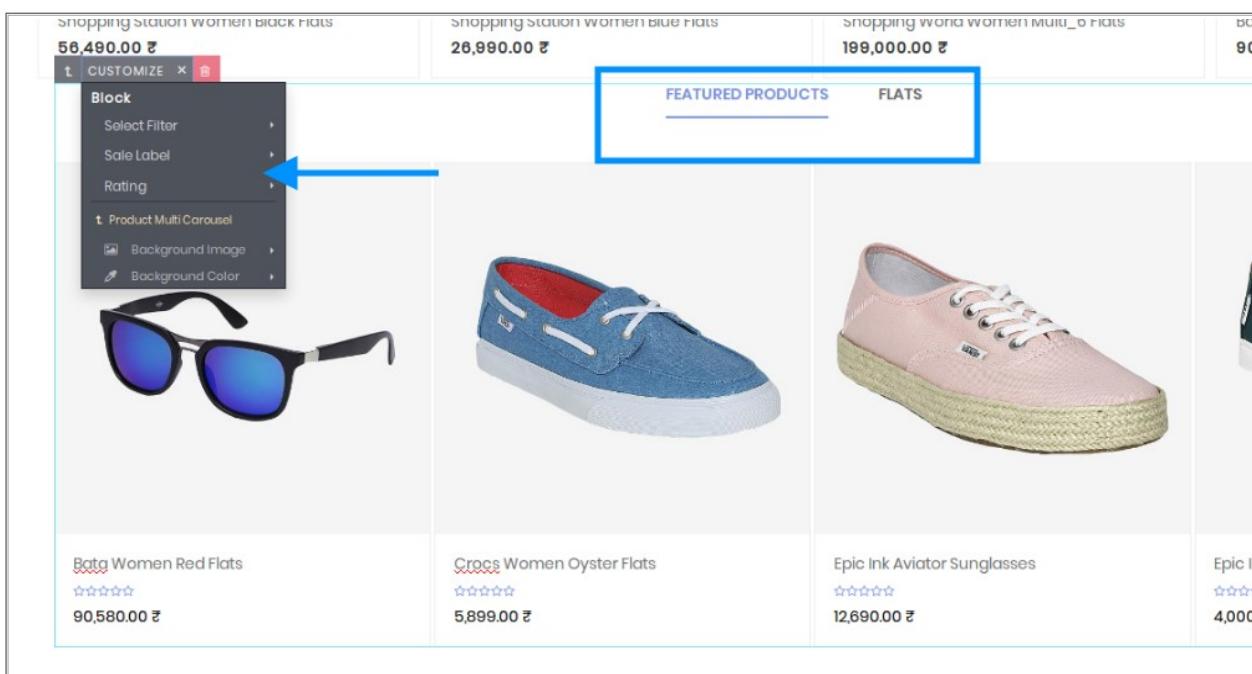

Create a new Record for Multi Carousel. For which, the created Product Carousel filters will be available for Selection. Select the Filter which you would like to display in your Web Page. Give name of the Filter and make sure to activate **Website Published**. Save the Changes

The screenshot shows the 'Select Filters' configuration screen. On the left, there's a sidebar with 'Filter Name' set to 'Multi Filter', 'Website Published' checked, and 'Select Filters' listed. The main area shows a list of filters: 'Featured Products' and 'Flats'. Below this is another list: 'service', 'Sellable', 'Featured Products', 'Flats', and a 'Create and Edit...' button. A large blue arrow points upwards from the bottom of the 'Create and Edit...' button towards the 'Select Filters' list.

Now to make the Carousel Visible in your Web Page, Drag the Snippet **Product Multi Carousel** available under **Ecommerce Snippets** Section.

On Dragging the Multi Filter with selected Filter will be Visible.

3. Employee Carousel

To Set Employee carousel go to (Odoo's Backend View) **Employees**. Create employees and Publish them for Website.

The screenshot shows the Odoo Employees module. At the top, there are tabs for Employees, Departments, and Configuration. Below the tabs, there are buttons for CREATE and IMPORT. The main area displays a grid of employee profiles. Each profile includes a small photo, the employee's name, their role, and a 'FOLLOWING' button. There are 11 employees listed in total, arranged in three rows of four and one row of three.

Now Go to Web Page and **Edit** it. Drag and drop **Employee Carousel snippet**. You can change styles of employee carousel from customize option. Then Save your changes.

The screenshot shows the Theme Infigo website builder interface. On the left, there is a sidebar with various snippet categories and styles. A blue box highlights the 'Employee Carousel' snippet under the 'Customer Carousel' category. The main workspace shows a preview of a website page with three 'SIGN UP' buttons and a section featuring four employee profiles: Aaron, Hank, Codddy, and Crystal. A tooltip over the first employee profile shows options like 'Block', 'Select Style', and 'Employee Carousel'. The 'Employee Carousel' option is highlighted with a blue box. The preview shows the employee names and roles below their photos.

4. Customer Carousel

To set customer carousel, Go to (Odoo's Backend View) CRM --> Customers.

The screenshot shows the CRM module's customer list. The top navigation bar includes tabs for CRM, Pipeline, Customers, Reporting, and Configuration. The 'Customers' tab is highlighted. Below the navigation is a search bar and filter options. The main area displays a grid of customer cards, each with a photo, name, company, and job title.

Customer	Company	Role
Administrator admin@example.com	Google	Google, Douglas Miles Web designer at Google
Google, Jason Forney Professor at Google	Google	Google, Kacie Gittens Social Worker at Google
Reebok, Derek Perkins Web developer at Reebok	Reebok	Infigo India info@yourcompany.com
	Reebok	Reebok, Hollie Chance Detective at Reebok
	Reebok	Reebok, Lizabeth Ferreri Sales Manager at Reebok
	Reebok	Reebok, Marian Dixon Sales Representative at Reebok

Select customer and Edit form view. Go to Sales & Purchases tab. Activate it as a customer. Save changes.

The screenshot shows the customer details for 'Google, Kacie Gittens'. The top navigation bar is identical to the previous screenshot. The main area shows a form with various fields like GSTIN, Tags, Mobile, Email, etc. Below the form are tabs for Contacts & Addresses, Internal Notes, Sales & Purchases, and Invoicing. The 'Sales & Purchases' tab is active. Under the Sales tab, there is a section for 'Sale' where the 'Is a Customer' checkbox is checked (indicated by a blue box). There is also a section for 'Purchase' with a 'Is a Vendor' checkbox which is unchecked.

Go to Contacts and Addresses tab of company. Edit form view and open customer.

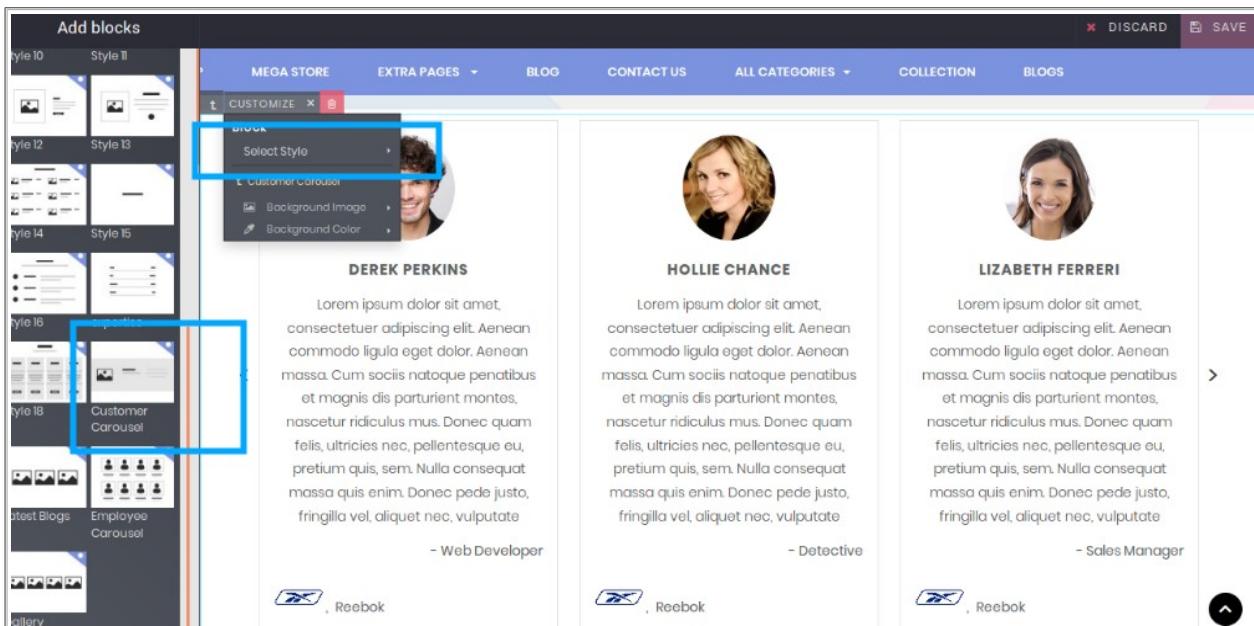

The screenshot shows the CRM application's customer list. At the top, there are tabs for CRM, Pipeline, Customers, Reporting, and Configuration. Below the tabs, it says 'Customers / Google'. There are 'EDIT' and 'CREATE' buttons. On the right, there is an 'Action' dropdown and a page number '2 / 12'. The main area displays a grid of contact cards. One card for 'Douglas Miles' is highlighted with a blue border. The card includes a photo, the name 'Douglas Miles', and the title 'Web designer'. Other contacts shown include Henrietta Anderson (Asset property manager), Jason Forney (Professor), and Kacie Gittens (Social Worker). To the left of the contact list, there are sections for Address, GSTIN, Tags, Phone, Mobile, Email, Website, and Language (set to English).

Fill up Review for customer and activate Available in website. Then save your changes.

This screenshot shows the 'Open: Contacts' modal window. It has a header 'Open: Contacts' and a close button 'X'. At the top, there are 'SAVE' and 'DISCARD' buttons. The modal contains fields for Contact Name (set to 'Douglas Miles'), Title (set to 'e.g. Mr.'), Job Position (set to 'Web designer'), Email, Phone, Mobile, and Notes ('internal note...'). Below these fields is a 'Review' section containing a text area with placeholder text: 'Lorem ipsum dolor sit amet, consectetuer adipiscing elit. Aenean commodo ligula eget dolor. Aenean massa. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus. Donec quam felis, ultricies nec, pellentesque eu, pretium quis, sem. Nulla consequat massa quis enim. Donec pede justo, fringilla vel, aliquet nec, vulputate'. An arrow points from the 'Website Published' checkbox to this text area. At the bottom of the modal are 'SAVE' and 'DISCARD' buttons.

Now go to webpage and Edit the page. Drag and drop Customer Carousel snippet. You can Change the style of customer carousel from customize option. Save your changes. You will get customer review carousel for your webpage.

NOTE Review field will visible only in those customers which are available in contacts & addresses tab. Customer will be visible at your webpage if it is published, contained review, available in website and Is customer activated.

5. Category Carousel

For having category carousel in your webpage, Go to (Odoo's Backend View) **Website --> Configuration --> Products --> eCommerce Categories.**

The screenshot shows the Odoo Website Backend interface. The top navigation bar includes 'Website', 'Dashboard', 'Orders', 'Catalog', 'Blog', 'Portfolio', 'Reporting', 'Configuration', and 'Administrator'. Below the dashboard, there's a chart titled 'SALES SINCE LAST WEEK' showing sales trends from 2021-07-01 to 2021-07-07. To the right of the chart is a summary of sales metrics: 8 Orders, \$7,201.18 Sold, 12 Carts, 1.14 Orders/Day, \$900.15 Average Order, and 66.67% Conversion. A sidebar on the right lists categories under 'eCommerce Categories': Brand, Website Carousel Filter, Website Carousel Multi Filter, Website Menu Configuration, Website Notification, Wishlist, Settings, eCommerce, Product Label, Payment Acquirers, Delivery Methods, Products, and eCommerce Categories (which is highlighted with a blue box). At the bottom, there's a section for 'TOP SELLERS' listing products like iPad Retina Display, iMac, and iPad Mini with their respective quantities and sold amounts.

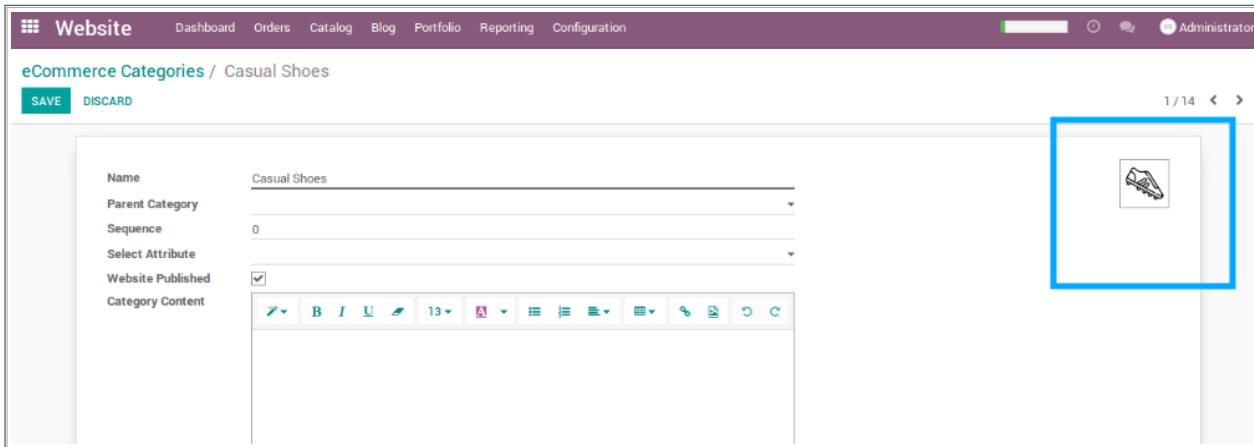

Go to category.

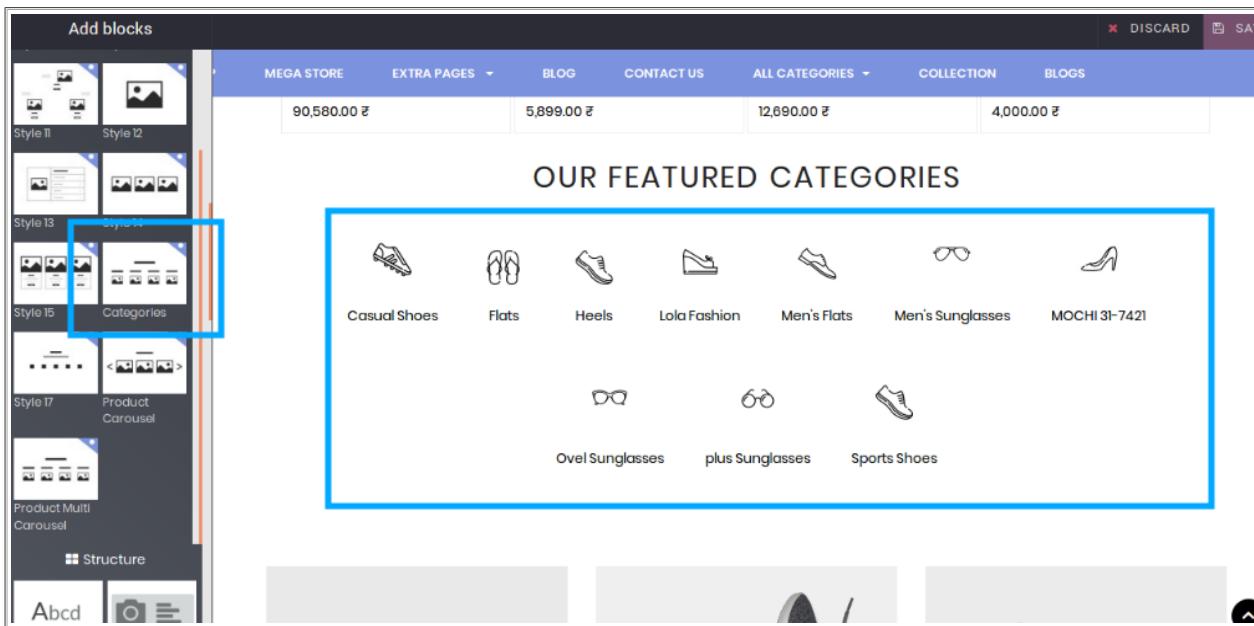

Set images in only those category in which parent category is not set.

The screenshot shows the 'eCommerce Categories' list view in Odoo. The top navigation bar is identical to the previous screenshot. The main area displays a list of categories with checkboxes for 'Display Name'. One category, 'Casual Shoes', has a blue arrow pointing to it, indicating it is a category without a parent category. A note at the top right of the list area says 'Parent Category is not set'. There are also search, filter, and group by options at the top right of the list table.

Edit form view and set image for that category. Save your changes.

Go to webpage and **Edit** it. Drag and drop **Categories** snippet and save it. You will get category carousel for your webpage.

6. Blog Carousel

For having blog carousel, You need to **Edit** the page in which you want latest blog carousel. Drag and drop **Latest blogs** snippet. You can change styles for latest blogs from customize option. Save your changes.

The screenshot shows the Odoo Infigo theme editor interface. On the left, a sidebar titled "Add blocks" displays various block styles numbered 10 through 18. A blue box highlights the "Customer Counsel" block style. On the right, the main content area shows a blog section with three posts:

- Vans Releases Embossed Sidewall ...** (December 13, 2017) - READ MORE →
- The Nike KD 10 Gets A New "Stripe" D...** (December 13, 2017) - READ MORE →
- Nike Air Max 1 Anniversary Releasin...** (December 13, 2017) - READ MORE →

A blue box also highlights the "Block" menu in the top right corner, which includes options like "Select Style", "Latest Blogs", "Background Image", and "Background Color". The top navigation bar includes links for MEGA STORE, EXTRA PAGES, BLOG, CONTACT US, ALL CATEGORIES, COLLECTION, and BLOGS. The bottom right corner features a circular profile picture.

Megastore Layout

1. How to Deactivate it?

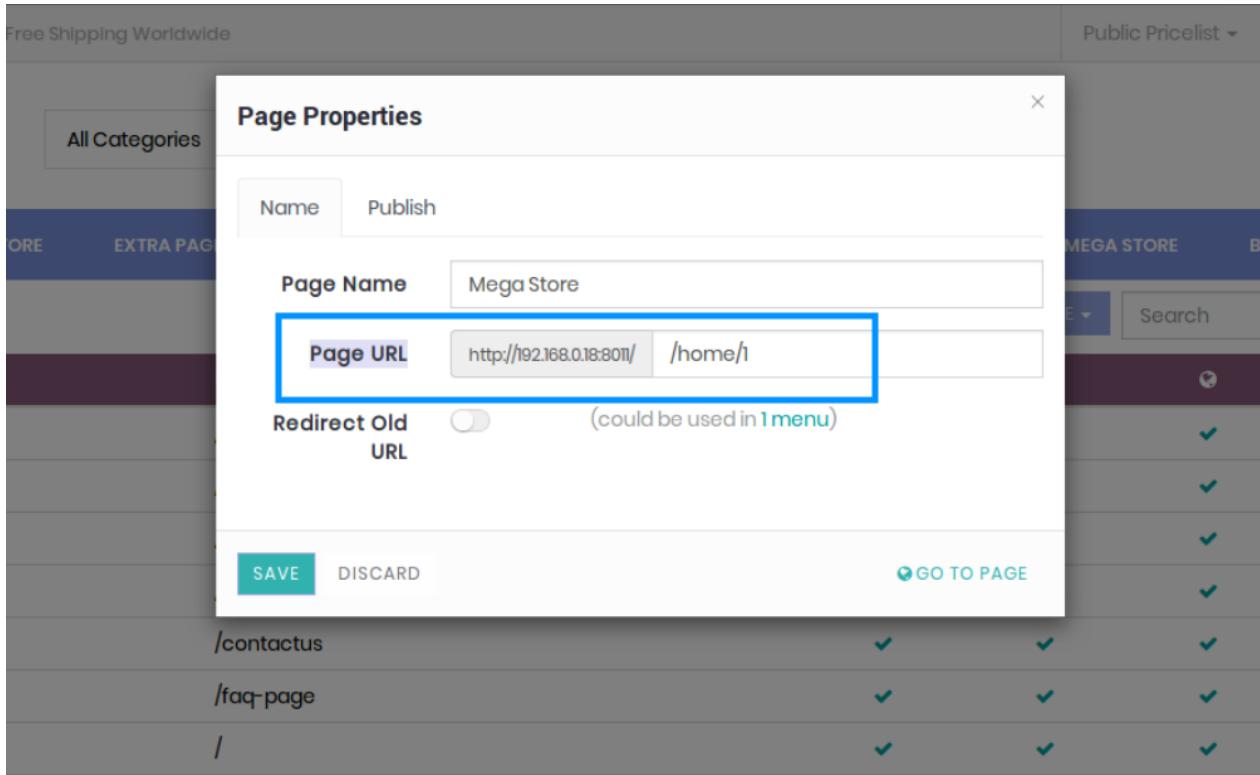

On Installing the theme_infigo a new Menu **Mega Store** will be visible in your Web Page. It has a static url (/home/1). Now if you want to change the url of the Page than go to **Content --> Manage Pages.**

Name	Url	Actions		
About Us	/aboutus			
blogs	/latest-blogs			
Business home	/business-home-1			
comming-soon	/coming-soon-page			
Contact Us	/contactus			
FAQ	/faq-page			
# Home	/			
Infigo Home	/infigo-home			
infigo_our_services	/our-services-page			
Mega Store	/home/1			

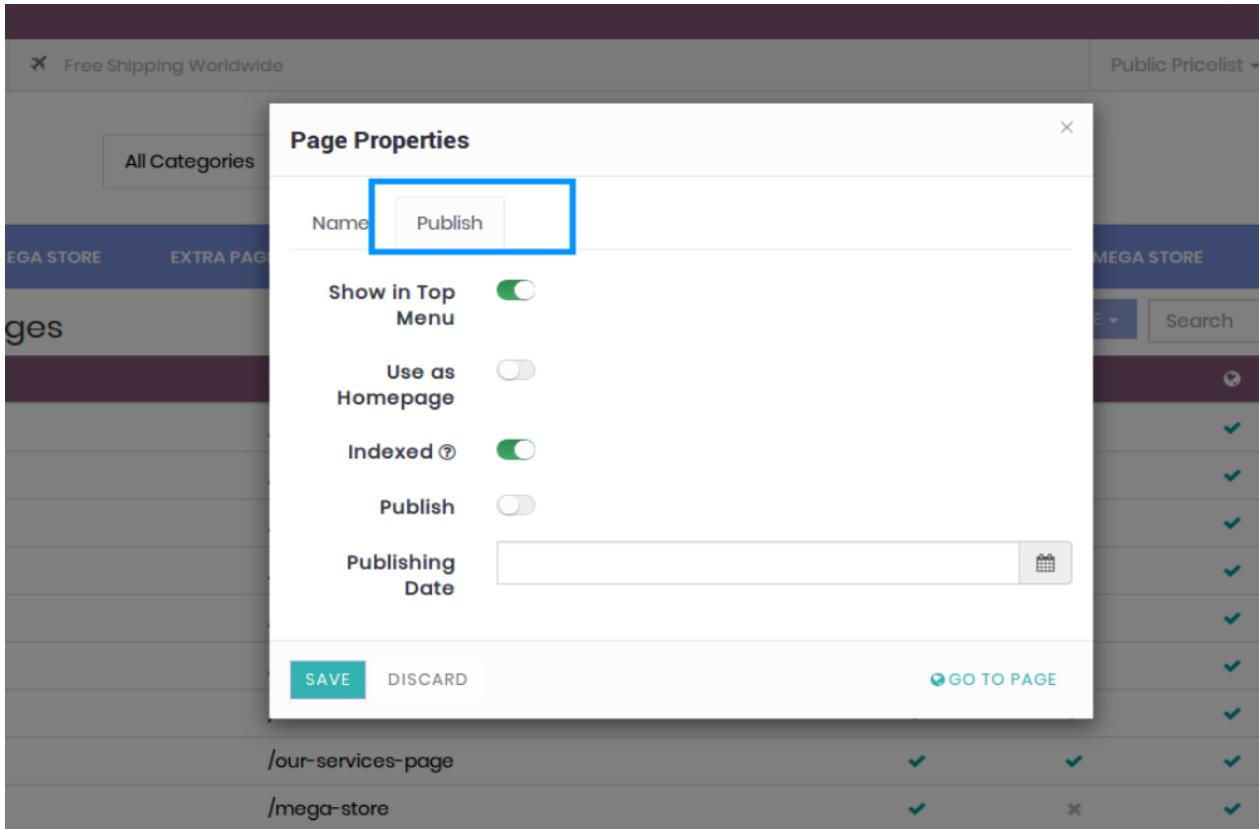

There you will find a Menu named **Mega Store** go to Setting

Contact Us	/contactus			
FAQ	/faq-page			
# Home	/			
Infigo Home	/infigo-home			
infigo_our_services	/our-services-page			
Mega Store	/home/1			
our-customer	/our-customer-page			

A pop up screen will open there you will find **Page URL** where the current url will be **/home/1**. There you can enter the url you want to set for the Page.

The other Tab named **Publish** will be visible which contains different settings for Page.
To Publish the page make sure the Publish button is set to on.

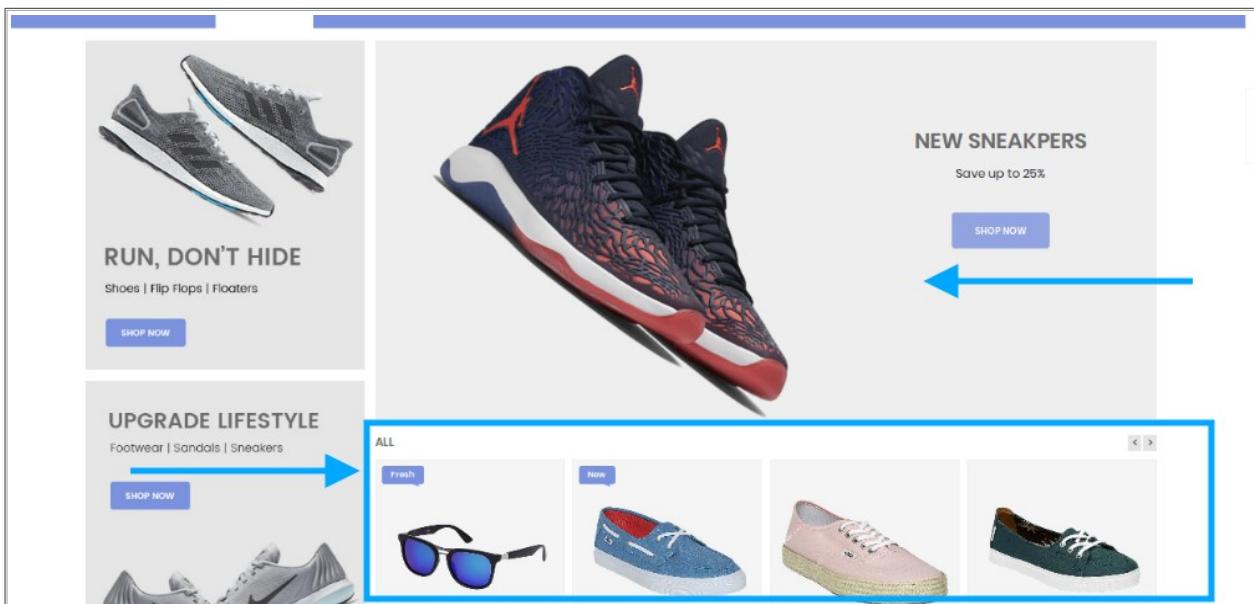

To Delete the Menu Mega Store Go to **Content --> Edit Menu** You will find a Menu named Mega Store. Click on Delete Menu and the menu will be deleted permanantly

2. Build your custom megastore layout

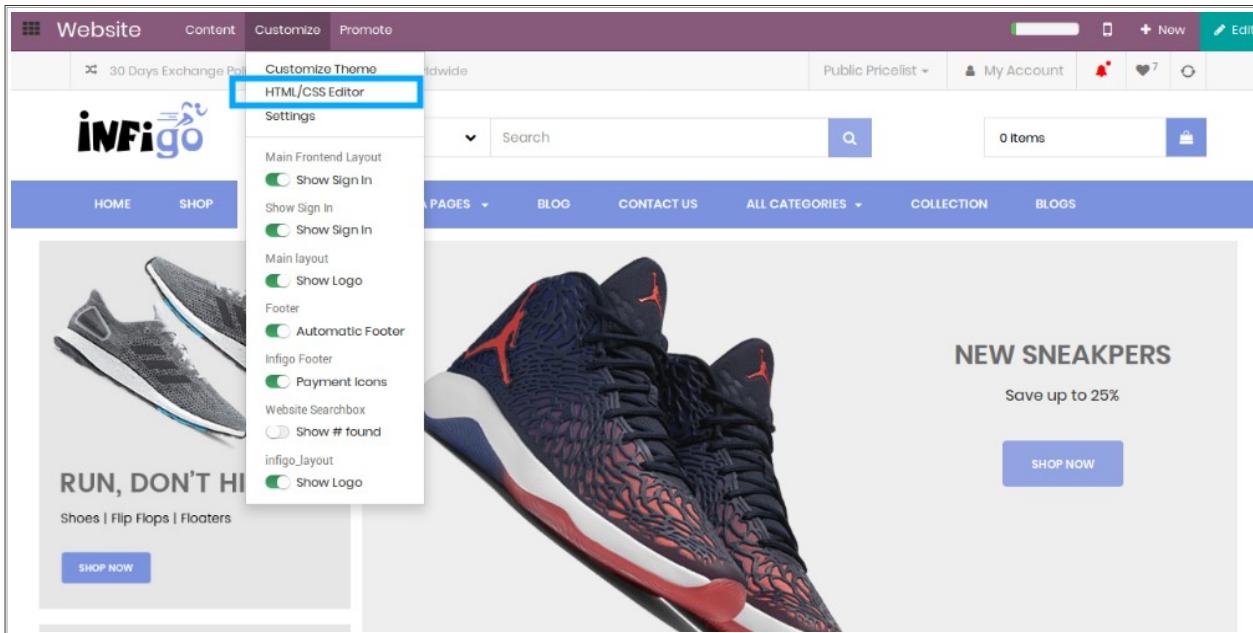

NOTE MegaStore Layout will not be editable by dragging and dropping CMS blocks from Website CMS Editor. Megastore Layout contains only static and fixed blocks design. To alter the design of it, you will need to change directly in Html/CSS Editor.

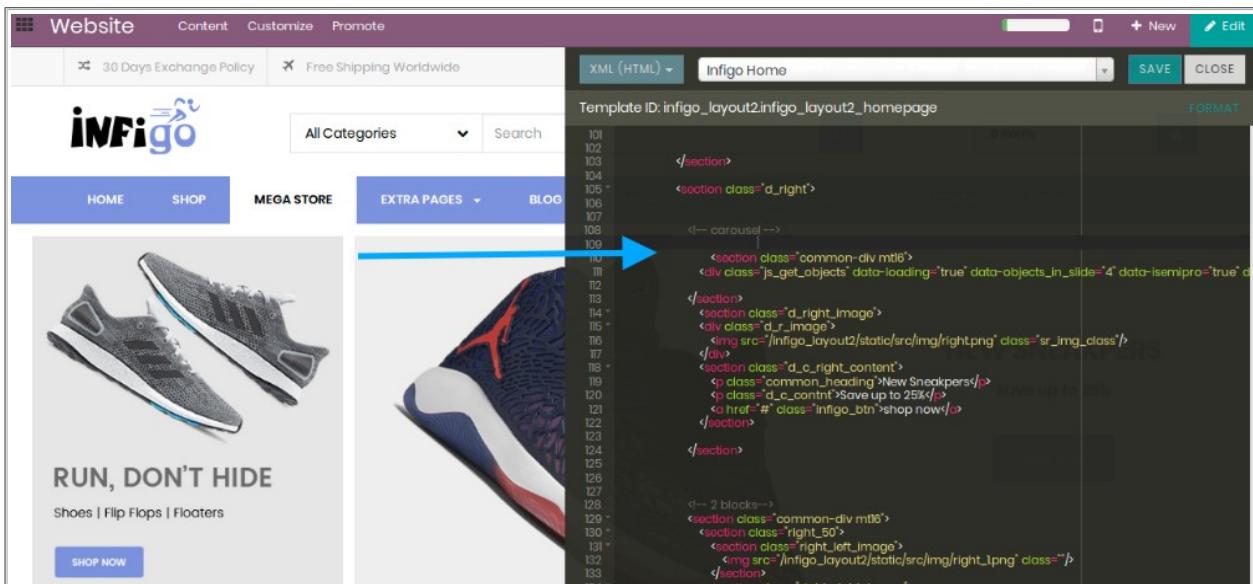

On installing the theme_infigo, a new Menu Mega Store will be visible in your Web Page. Go to that page.

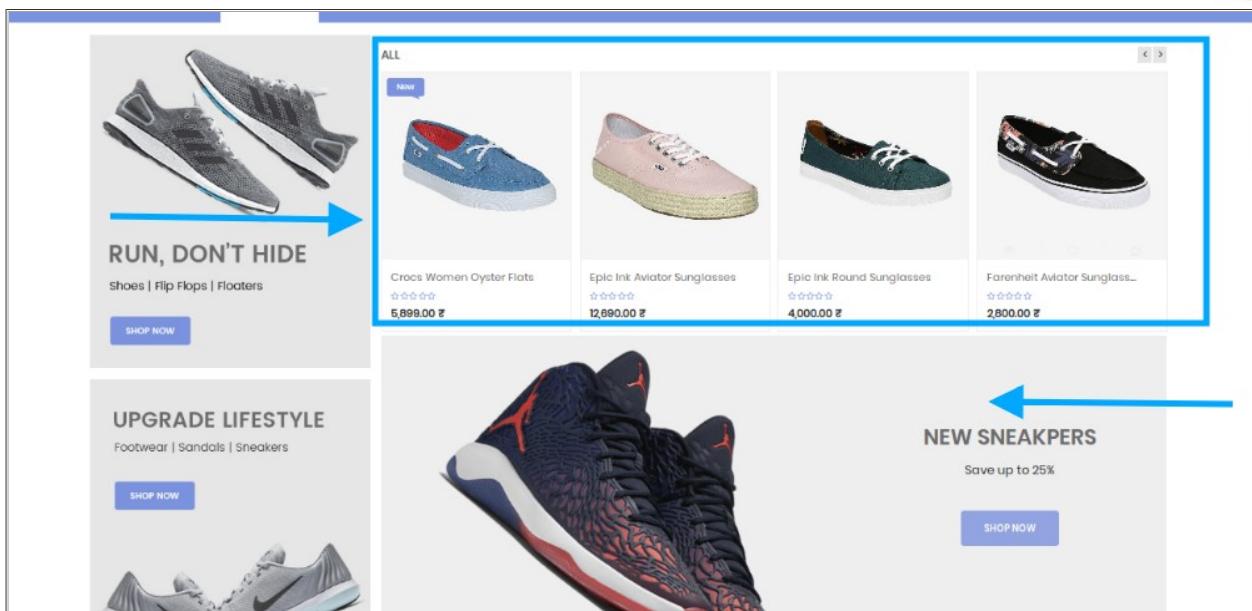

In above screenshot , there is first section at right side having image and some content. And there is second section for product carousel. To edit this sections, Go to **Customize menu** and click **Html/CSS Editor**.

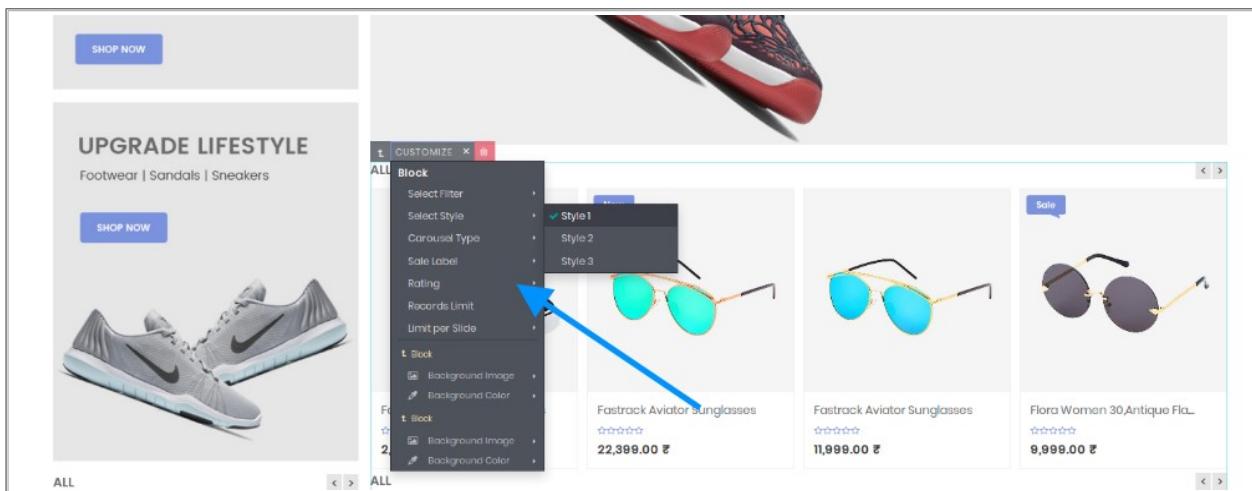

Interchange sections from there by editing the html.

Save your Html/Css changes from the editor. And see the output at your mega store. In below screenshot. Product carousel is now at first section and the section with image and content is second section. So you can make your custom layout for megastore.

Now to **Edit** the carousel data open the Page in Editable form and you can select different styles, set labels, ratings and many more.

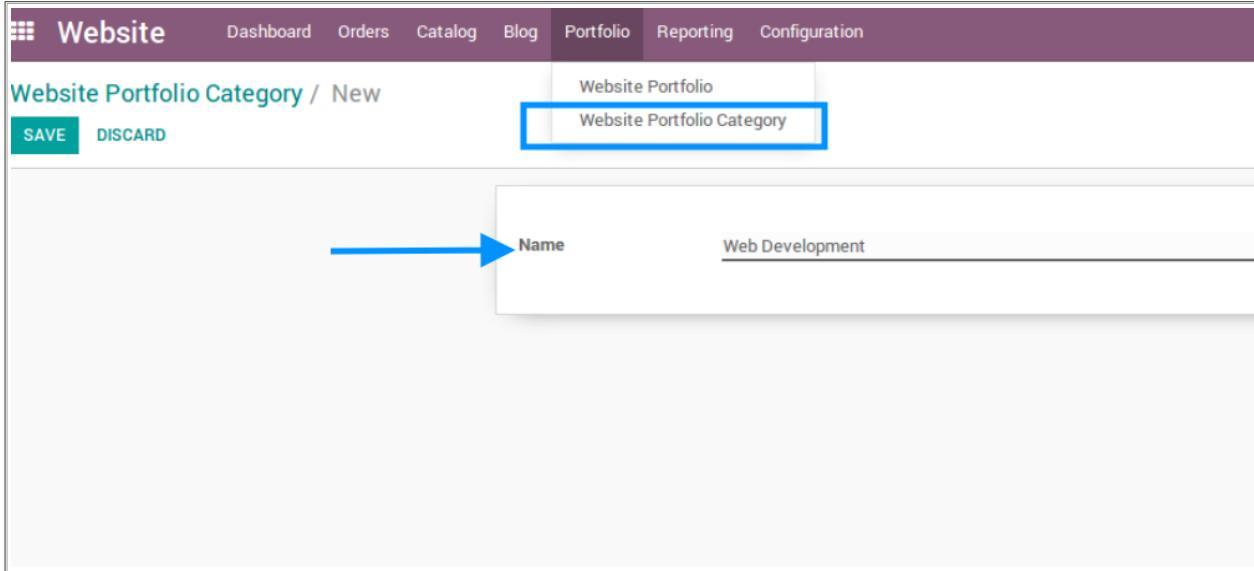

You can also Duplicate the Carousel or any snippet at your Mega Store Layout.

Website CMS Blocks

1. Portfolio Snippet

To Create Portfolio go to **Website --> Portfolio --> Website Portfolio Category**. Create a Portfolio category and give the name of the Category. Save the changes.

Now go to **Website --> Portfolio --> Website Portfolio**. Create a new Record for Portfolio and give Name, Short Description, Portfolio Image, Sequence, Url (if any).

This screenshot shows the initial state of a portfolio creation form. It includes fields for Name (Minimal Portfolio), Short Description (Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud ex...), Category (Portfolio Image), Portfolio Image (a small thumbnail image of a laptop and smartphone), Sequence (2), Url (#), Published in Website (checked), and Multiple Images (a section with an 'Add an item' button).

Also the category that you have created will be visible in the drop down. You can select the category for which you want to make the portfolio visible.

This screenshot shows the same portfolio creation form, but the Category field has been selected, opening a dropdown menu. The menu contains 'Web Development x' (which is currently selected and highlighted in grey), 'Designing', 'Projects', 'General', and 'Web Designing'. There is also a 'Create and Edit...' option at the bottom of the list. The rest of the form remains the same as the first screenshot.

Also you can set the multi images of the Portfolio. Save the changes.

The screenshot shows a configuration screen for a portfolio item. The top section contains basic information:

Name	Minimal Portfolio
Short Description	Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et
Category	Web Development X
Portfolio Image	(No image selected)

Below this are sequence and URL fields:

Sequence	2
Url	#

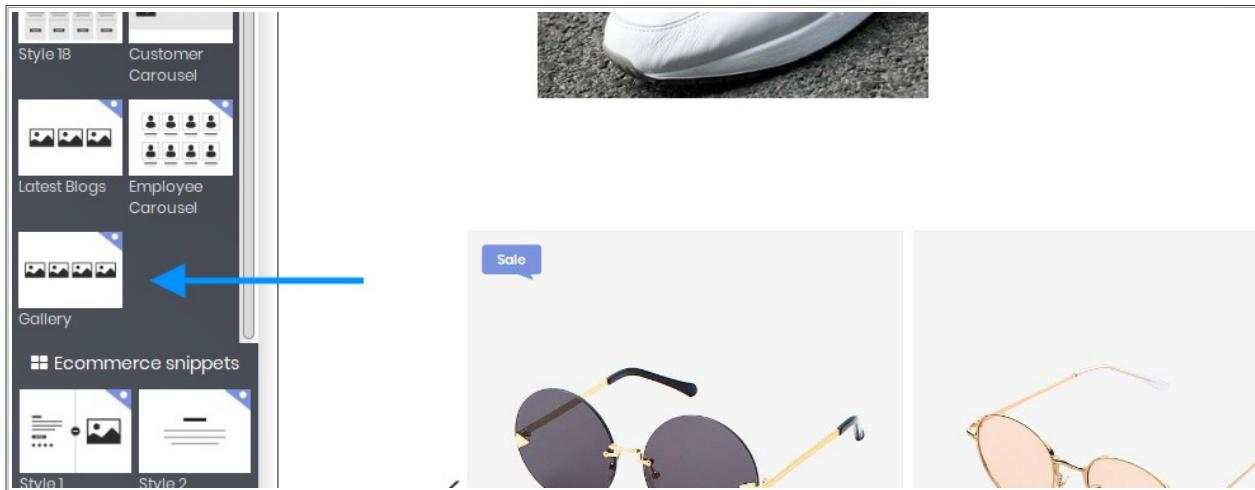

A checked checkbox indicates the item is published:

Published in Website	<input checked="" type="checkbox"/>
----------------------	-------------------------------------

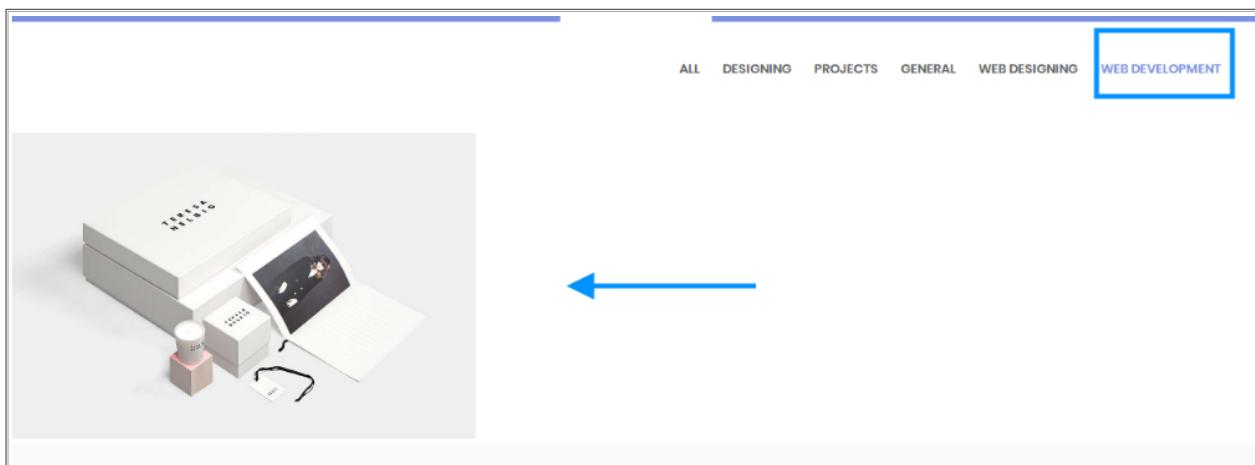

The bottom section, highlighted by a blue box, is for managing multiple images:

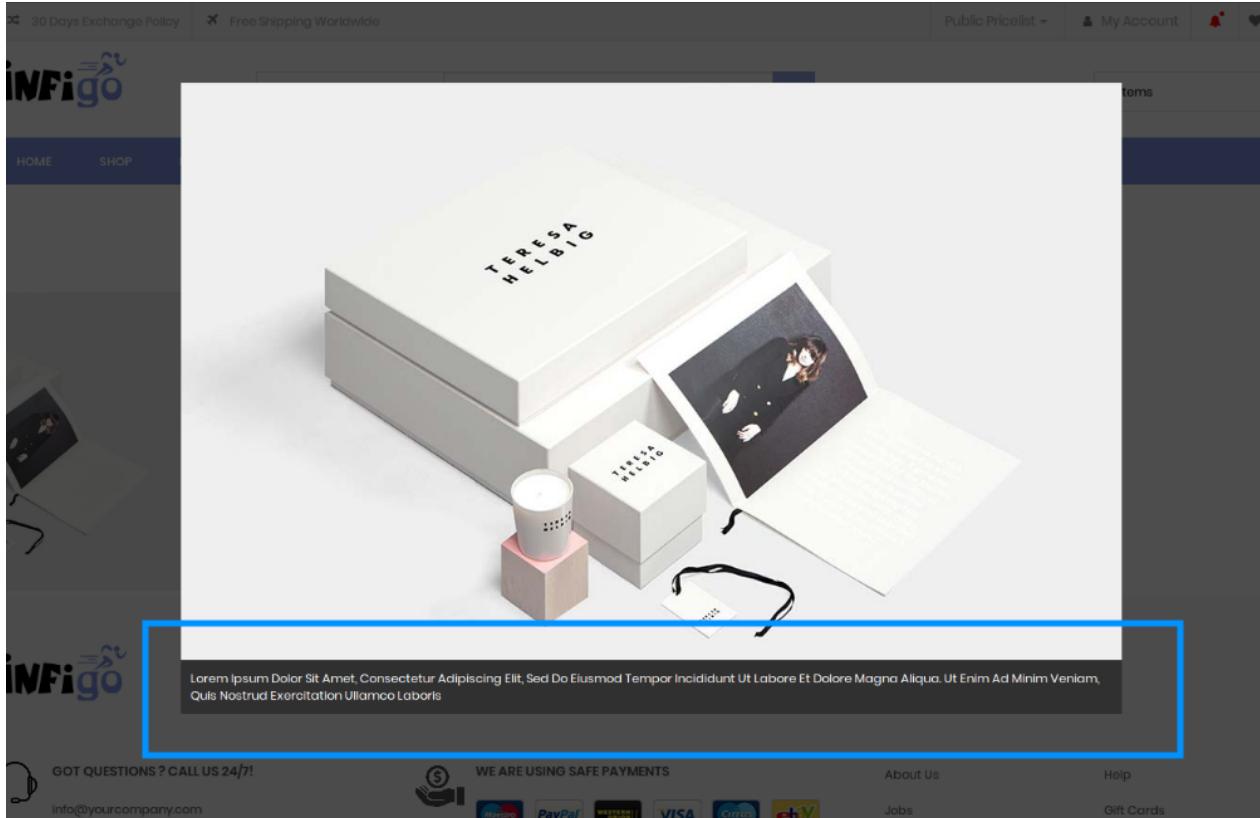

Multiple Images	Name
Add an item	

Make sure you have selected the **Published in Website** option. Now to make visible the portfolio in Web Page Drag the snippet **Gallery** available in **Infigo Business Snippets** Save the Web Page.

After dragging the portfolio the category and it's portfolio Images alongwith name,image,url will be visible. On clicking on image the pop up for images will be visible in slider format along with multi images of each individual category.

[Click Here to see video of this Feature.](#)

2. Expertise CMS Block Setting

Expertise CMS block is available in Infigo to showcase your expertise in percentage format by different categories. Those settings are dynamic and can be done at backend.

The screenshot displays the homepage of a website using the Infigo theme. At the top, there is a navigation bar with links for All Categories, Search, 0 item: 0.00 €, and a shopping cart icon. Below the navigation is a main banner featuring a woman smiling while working on a laptop and holding a coffee cup. The banner includes a "BIG SALE" header, a "50% OFF" offer, and a "SHOP NOW" button.

SPECIALIZATION

HTML 70%

CSS 80%

Jquery 80%

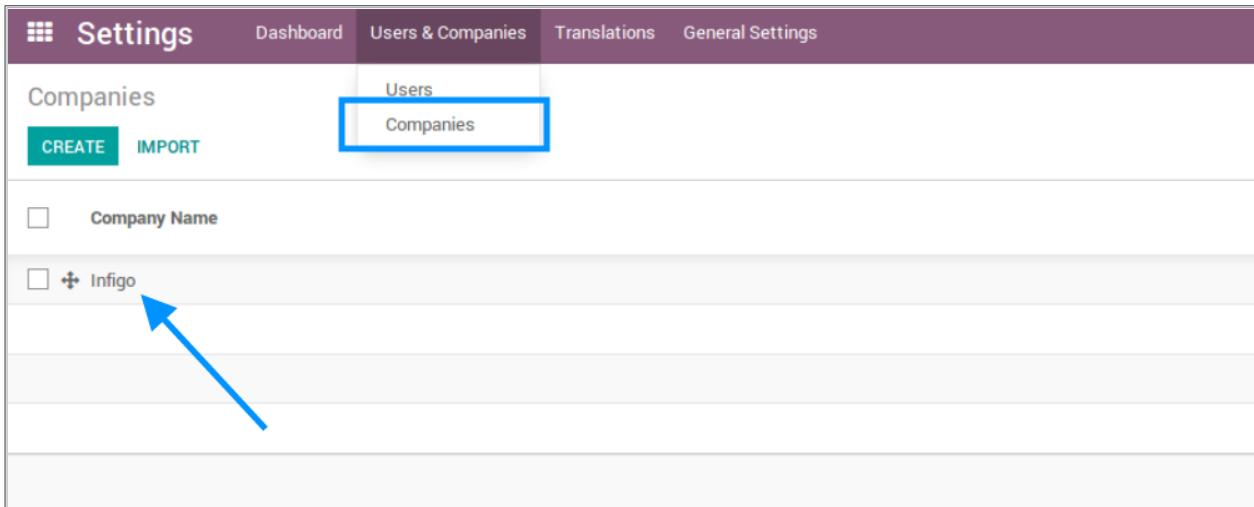

Bootstrap 70%

A blue arrow points from the text "HTML" towards the first progress bar.

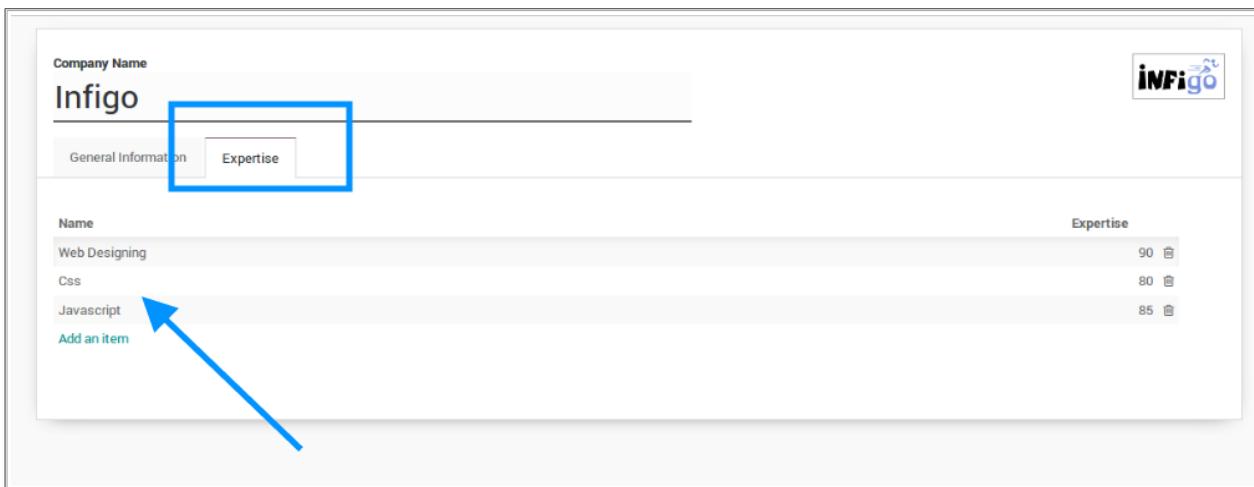

EXCLUSIVE SHOES

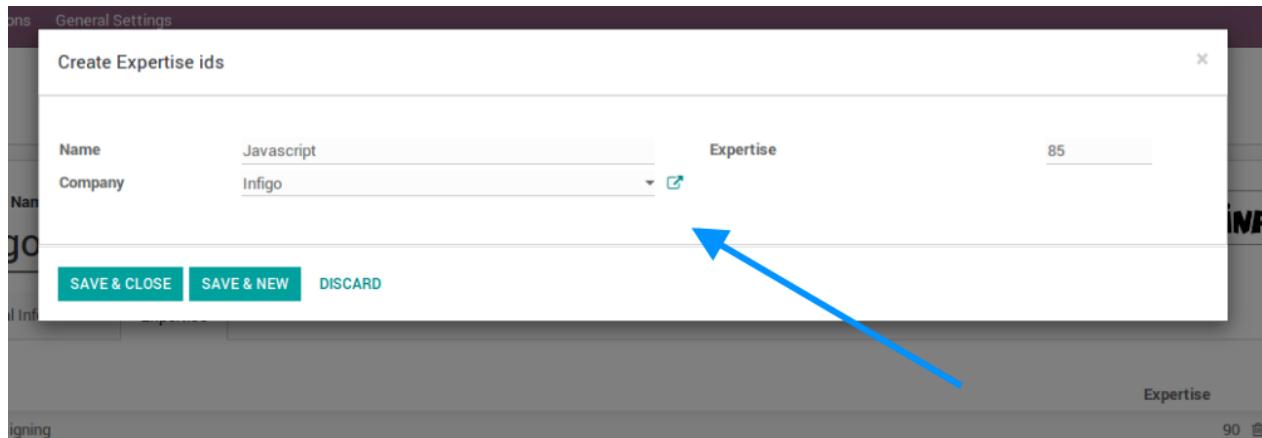

Product Image	Name	Rating	Original Price	Discounted Price
	Chemistry Women Beige Heels	★★★★★	42,000.00 €	38,700.00 €
	Chemistry Women Black Heels	★★★★★	29,300.00 €	26,459.10 €
	Cute Fashion Women Beige He...	★★★★★	34,900.00 €	31,491.00 €
	Digni Women Gold Heels	★★★★★	34,900.00 €	31,491.00 €

To Set Expertise Data go to **Website --> Users & Companies -> Companies** open the Company for which you want to show Expertise Data. Make sure that in your website settings, this company is selected as main company for your website.

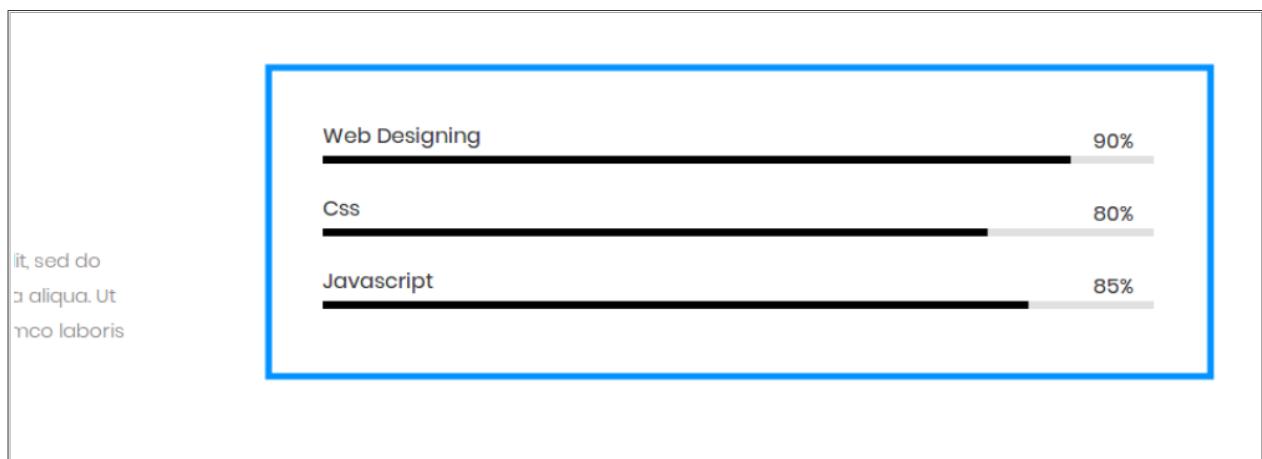

Now Open the Company Record and go to **Expertise** Tab, there add the expertise data by adding name, percentage of Expertise and select the company for which you want to show the Expertise. Save the Changes.

Now go to your Web Page Drag and drop the Expertise Snippet.
